

This product is a walk through the muscle unit one section at a time. It covers muscle structure, physiology and metabolism, how to name muscles, muscles of the different regions of the body, and some diseases and conditions. Of course, it is not all inclusive for naming the muscles, but it will require students to look up certain muscles and their functions.

The product contains 8 pages of worksheets and 8 pages of answer key, 16 total pages. It requires students to go through the steps of muscle contraction at the molecular level and learn the gross anatomy of individual muscles. It can be used in anatomy and physiology and health sciences, nursing, or EMS classes. There are matching, fill in-the-blank, and short answer questions.

**Assessment of the Ergonomic Quality of Hand-Held Tools and Computer Input Devices** H. Strasser, 2007-10-05 The International Ergonomics Association IEA is currently developing standards for Ergonomic Quality in Design EQUID which primarily intends to promote ergonomics principles and the adaptation of a process approach for the development of products work systems and services It is important to assess the ergonomic quality of products hand held tools and computer input devices through working processes that represent reality Well designed working tools can be expected to reduce or eliminate fatigue discomfort accidents and health problems and they can lead to improvements in productivity and quality Furthermore absenteeism job turnover and training costs can positively be influenced by the working tools and the environment Not all these short term and long term issues of working tools can be quantified in pragmatically oriented ergonomic research approaches But multi channel electromyography which enables the measurement of the

physiological costs of the muscles involved in handling tools during standardized working tests and subjective assessments of experienced subjects enable a reliable insight in the essential ergonomic criteria of working tools and products In this respect it is advantageous to provide a test procedure in which working tests can be carried out alternating both with test objects and reference models
