diseases is concerned Making matters worse is the resurgence of deadlier forms of diseases whose causes remain unknown making the ailment irresolvable Disease management has been directed by the use of synthetic pharmaceutical products and other modalities rather than focusing on the restoration of the health since healthy individuals do not experience any disease In this book the author shares with you the two main reasons people acquire disease The reasons are related to your lifestyle The choice you make every day determine whether you remain healthy or not The choice provided here is simple and will soon put you on the road to a healthier life *Orthomolecular Nutrition for Everyone* Helen Saul Case,2017-03-14

Orthomolecular nutrition prevents and cures disease This fact has been ignored by our current health care system the media and the medical literature Why doesn't your doctor use nutritional therapy Is it for lack of safety Because it's not effective Because it's expensive It happens to be none of these Despite what you have been told nutritional medicine is safe and effective It is remarkably inexpensive especially when compared to the incredibly high cost of modern medicine The evidence from nearly 80 years of research by orthomolecular physicians proves it nutritional therapy works Most vitamin research you hear about focuses on low and therefore inadequate doses of vitamins Low doses do not get clinical results High dose vitamin therapy does it has for decades But which vitamins should we take How much Is taking all those vitamins safe This book addresses common questions about supplementation including dosing safety and just what all those extra vitamins do for you It also covers what to eat and why the real story about exercise and good health why we shouldn't fear germs and how each and every vitamin can get you better now and keep you well in the future **The Deepest Form of Relaxation** Festus

George-Sawyer,2013-09-30 Throughout my life I have been always on the go always looking for the next level I've never felt settled and comfortable always setting the next goal as soon as the current one nears completion and pushing myself all the time With this attitude I felt myself under pressure most of the time and with pressure comes stress loads of stress and the feeling that I never had enough time I was burning the candle at both ends but I concluded that this was what life required For those of us who want to thrive and lead a healthy lifestyle in this high pressure world of instability confusion constant change and stress we couldn't stand a chance if we were physically or mentally sluggish So when I got to know about flotation therapy I quickly realised that this could be the natural answer to the stresses of this ever changing world of ours Regular floating can be the way to relax your tired body while engaging your subconscious mind as you control your thoughts I discovered that regular floating made me a healthier and happier person I said goodbye to a stressful lifestyle as I exercised and reinforced my body's capacity for happy thoughts healing good sleep creativity and imagination I had lower blood pressure easier concentration and more energy I discovered how regular floating positively changed my life and helped me focus on the things I want out of life The powerful technique of floating can help people especially go getters to achieve their goals to become much more centred and to tackle the issues and problems that life throws at them easily and calmly Isn't true that if we approach our problems in a relaxed state we stand a better chance of solving them So when I was called up to run

one of the very first flotation centres in England I was completely blown away by the difference this form of therapy made in my life The experience of lying in a tank a gravity free environment experiencing weightlessness and proper blood circulation sold me on the idea of floating regularly I thought of the millions of people out there with busy lifestyles like me who could find the results from floating regularly very helpful I thought of people who may be magnesium deficient who may be at risk of developing or already suffer from poor blood circulation diabetes arthritis obesity stroke cancer heart disease fatigue and those who may be so stressed out that they cannot even sleep at night At the flotation centre I started researching flotation and the difference it made in peoples lives My position at the time facilitated this research as I always found the time to chat with all my clients about their experiences on the day to see what changes regular floating was making for them What I found was that there was not enough information out there about how this fantastic therapy can be beneficial in the long term I was so involved with the floating business that even my spare time was eaten up by research on the topic and I promised myself that as soon as the opportunity arose I would put pen to paper to let the world know in depth the benefits of being present within switching off and being in solitude and seclusion while spending some time in a gravity free sensory deprivation isolation tank for just an hour or a lunchtime holiday
