Glacial Isostatic Adjustment Giorgio Spada, Daniele Melini, 2025-07-28 This book aims at presenting a synthetic but self contained theory of Glacial Isostatic Adjustment GIA firmly grounded on physics and mathematics However at the same time it also describes various phenomenological aspects making it appealing also to a broad audience of Earth scientists not having a

technical background The interest on GIA is motivated by the entangled processes involved reflecting interactions between the solid Earth the oceans and the cryosphere In the context of climate change GIA has a special role For example ground or space based geodetic methods aimed at observing the mass balance variations of the contemporary ice sheets require a GIA correction before they can be suitably interpreted For these reasons GIA modeling has seen a considerable development recently with a growing attention by a broad audience of scientists in the fields of geophysics geology geodesy and Earth system science

Asteroids Martin Elvis, 2021-05-01 A unique wide ranging examination of asteroid exploration and our future in space Human travel into space is an enormously expensive and unforgiving endeavor So why go In this accessible and authoritative book astrophysicist Martin Elvis argues that the answer is asteroid exploration for the strong motives of love fear and greed Elvis s personal motivation is one of scientific love asteroid investigations may teach us about the composition of the solar system and the origins of life A more compelling reason may be fear of a dinosaur killer sized asteroid hitting our planet Finally Elvis maintains we should consider greed asteroids likely hold vast riches such as large platinum deposits and mining them could provide both a new industry and a funding source for bolder space exploration Elvis explains how each motive can be satisfied and how they help one another From the origins of life to space billiards and space sports Elvis looks at how asteroids may be used in the not so distant future
