Information-Based Manufacturing Michael J. Shaw,Michael Shaw,2001-01-31 Because of their mutually influencing interactions information systems and modern manufacturing systems are intertwined They have been so integrated that information systems have become an embedded and critical component of any effective manufacturing system The impact of the increasing focus on information permeates throughout the manufacturing life cycle from product conceptualization design process planning all the way to production order fulfilment and customer services For these reasons it is critical that we study information based manufacturing in its entirety crossing the traditional functional boundaries and building as much synergy between Information Systems IS Information Technology IT and manufacturing as possible This is the motivation for

this book and to this end the purpose of this book is threefold to establish an up to date interdisciplinary research framework for information based manufacturing that builds on the research foundation from IS and IT and manufacturing research to develop a forward looking research agenda for information based manufacturing for identifying future directions for research and applications and to foster a joint academic and industrial research agenda in information systems and manufacturing by identifying the greatest synergy possible between academic research and industrial practices
