*In your notebook, solve the following problems.*

**SECTION 6.1 ORGANIZING THE ELEMENTS**

1. Which element listed below should have chemical properties similar to fluorine (F)?
  - a. Li
  - b. Si
  - c. Br
  - d. Ne
2. Identify each element as a metal, metalloid, or nonmetal.
  - a. fluorine
  - b. germanium
  - c. zinc
  - d. phosphorus
  - e. lithium
3. Which of the following is *not* a transition metal?
  - a. magnesium
  - b. titanium
  - c. chromium
  - d. mercury
4. Name two elements that have properties similar to those of the element potassium.
5. Elements in the periodic table can be divided into three broad classes based on their general characteristics. What are these classes and how do they differ?

**Inorganic Chemistry** Catherine E. Housecroft, A. G. Sharpe, 2008 Designed as a student text Inorganic Chemistry focuses on teaching the underlying principles of inorganic chemistry in a modern and relevant way

**Water Chemistry** Stanley E. Manahan, 2010-08-19 Carefully crafted to provide a comprehensive overview of the chemistry of water in the environment Water Chemistry Green Science and Technology of Nature s Most Renewable Resource examines water issues within the broad framework of sustainability an issue of increasing importance as the demands of Earth s human population threaten to overwhelm the planet s carrying capacity Renowned environmental author Stanley Manahan provides more than just basic coverage of the chemistry of water He relates the science and technology of this amazing substance to areas essential to sustainability science including environmental and green chemistry industrial ecology and green sustainable science and technology The inclusion of a separate chapter that comprehensively covers energy including renewable and emerging sources sets this book apart Manahan explains how the hydrosphere relates to the geosphere atmosphere biosphere and anthrosphere His approach views Planet Earth as consisting of these five mutually interacting spheres He covers biogeochemical cycles and the essential role of water in these basic cycles of materials He also defines environmental

chemistry and green chemistry emphasizing water's role in the practice of each. Manahan highlights the role of the anthrosphere that part of the environment constructed and operated by humans. He underscores its overwhelming influence on the environment and its pervasive effects on the hydrosphere. He also covers the essential role that water plays in the sustainable operation of the anthrosphere and how it can be maintained in a manner that will enable it to operate in harmony with the environment for generations to come. Written at an intermediate level, this is an appropriate text for the study of current affairs in environmental chemistry. It provides a review and grounding in basic and organic chemistry for those students who need it and also fills a niche for an aquatic chemistry book that relates the hydrosphere to the four other environmental spheres.

**The Periodic Table: Nature's Building Blocks** J. Theo Kloprogge, Concepcion P. Ponce, Tom Loomis, 2020-11-18. The Periodic Table: Nature's Building Blocks: An Introduction to the Naturally Occurring Elements, Their Origins and Their Uses addresses how minerals and their elements are used, where the elements come from in nature, and their applications in modern society. The book is structured in a logical way using the periodic table as its outline. It begins with an introduction of the history of the periodic table and a short introduction to mineralogy. Element sections contain their history, how they were discovered, and a description of the minerals that contain the element. Sections conclude with our current use of each element. Abundant color photos of some of the most characteristic minerals containing the element accompany the discussion. Ideal for students and researchers working in inorganic chemistry, mineralogy, and geology, this book provides the foundational knowledge needed for successful study and work in this exciting area. Describes the link between geology, minerals, and chemistry to show how chemistry relies on elements from nature. Emphasizes the connection between geology, mineralogy, and daily life, showing how minerals contribute to the things we use and in our modern economy. Contains abundant color photos of each mineral that bring the periodic table to life.
