The Admission Test Series prepares students for entrance examinations into college graduate and professional school as well as candidates for professional certification and licensure **"Proof," Policy, and Practice** Paul E. Lingenfelter,2023-07-03

How can we fix our schools Improve graduation rates in college What works These are questions that make the headlines and vex policy makers practitioners and educational researchers While they strive to improve society there are frequently gulfs of mutual incomprehension among them Academics longing for more influence may wrongly fault irrationality ideology or ignorance for the failure of research to inform policy and practice more powerfully Policy makers and practitioners may doubt that academics can deliver ideas that will reliably yield desirable results This book bridges the divide It argues that unrealistic expectations lead to both unproductive research and impossible standards for evidence based policy and practice and it offers promising ways for evidence to contribute to improvement It analyzes the utility and limitations of the different research methods that have been applied to policy and practice as well as the strengths and weaknesses of educational reform strategies It explains why using evidence for accountability often makes things worse rather than better Paul Lingenfelter offers educational researchers and policy makers a framework for considering such questions as What problems are important and accessible What methods will be fruitful Which help policy makers and practitioners make choices and learn how to improve What information is relevant What knowledge is valid and useful How can policy makers and practitioners establish a more productive division of labor based on their respective capabilities and limitations He cautions against the illusion that straight forward scientific approaches and data can be successfully applied to society s most complex problems While explaining why no single policy or intervention can solve complex problems he concludes that determination measurement analysis and adaptation based on evidence in specific situations can lead to significant improvement This positive even handed introduction to the use of research for problem solving concludes by suggesting emerging practices and approaches that can help scholars practitioners and policy leaders become more successful in reaching their fundamental goals

Common Knowledge W. Russell Neuman,Marion R. Just,Ann N. Crigler,2018-12-14 Photo opportunities ten second sound bites talking heads and celebrity anchors so the world is explained daily to millions of Americans The result according to the experts is an ignorant public helpless targets of a one way flow of carefully filtered and orchestrated communication Common Knowledge shatters this pervasive myth Reporting on a ground breaking study the authors reveal that our shared knowledge and evolving political beliefs are determined largely by how we actively reinterpret the images fragments and signals we find in the mass media For their study the authors analyzed coverage of 150 television and newspaper stories on five prominent issues drugs AIDS South African apartheid the Strategic Defense Initiative and the stock market crash of October 1987 They tested audience responses of more than 1 600 people and conducted in depth interviews

with a select sample What emerges is a surprisingly complex picture of people actively and critically interpreting the news making sense of even the most abstract issues in terms of their own lives and finding political meaning in a sophisticated interplay of message medium and firsthand experience At every turn Common Knowledge refutes conventional wisdom It shows that television is far more effective at raising the saliency of issues and promoting learning than is generally assumed it also undermines the assumed causal connection between newspaper reading and higher levels of political knowledge Finally this book gives a deeply responsible and thoroughly fascinating account of how the news is conveyed to us and how we in turn convey it to others making meaning of at once so much and so little For anyone who makes the news or tries to make anything of it Common Knowledge promises uncommon wisdom
