Formal Methods for Distributed System Development Tommaso Bolognesi, Diego Latella, 2013-03-20 th The 20 anniversary of the IFIP WG6 1 Joint International Conference on Fonna Methods for Distributed Systems and Communication Protocols FORTE XIII PSTV XX was celebrated by the year 2000 edition of the Conference which was held for the first time in Italy at Pisa October 10 13 2000 In devising the subtitle for this special edition Fonna Methods Implementation Under Test we wanted to convey two main concepts that in our opinion are reflected in the contents of this book First the early pioneering phases in the development of Formal Methods FM's with their conflicts

between evangelistic and agnostic attitudes with their over optimistic applications to toy examples and over skeptical views about scalability to industrial cases with their misconceptions and myths all this is essentially over Many FM s have successfully reached their maturity having been implemented into concrete development practice a number of papers in this book report about successful experiences in specifying and verifying real distributed systems and protocols Second one of the several myths about FM s the fact that their adoption would eventually eliminate the need for testing is still quite far from becoming a reality and again this book indicates that testing theory and applications are still remarkably healthy A total of 63 papers have been submitted to FORTEIPSTV 2000 out of which the Programme Committee has selected 22 for presentation at the Conference and inclusion in the Proceedings **Cumulated Index Medicus** ,1982
