Mathematical Entity Linking Methods and Applications Philipp Scharpf, 2025-05-09 This research book explores the adaptation of traditional Entity Linking techniques to Mathematical Entity Linking MathEL for STEM disciplines addressing the limitations of current Information Retrieval methods in handling mathematical expressions By developing and evaluating novel MathEL approaches using AI Machine Learning and the Wikidata Knowledge Graph significant progress is achieved in areas such as Formula Concept recognition semantic formula search mathematical question answering physics exam question generation and STEM document classification The study also introduces a suite of open source Wikimedia MathEL tools including AnnoMathTeX MathQA and PhysWikiQuiz designed to advance Mathematical Information Retrieval and support innovative applications in academic and educational contexts

Academic Literacy and the Nature of Expertise Cheryl Geisler, 2013-11-05 The first full length account integrating both the cognitive and sociological aspects of reading and writing in the academy this unique volume covers educational research on reading and writing rhetorical research on writing in the disciplines cognitive research on expertise in ill defined problems and sociological and historical research on the professions The author produced this volume as a result of a research program aimed at understanding the relationship between two concepts literacy and expertise which traditionally have been treated as quite separate phenomena A burgeoning literature on reading and writing in the academy has begun to indicate fairly consistent patterns in how students acquire literacy practices This literature shows furthermore that what students do is quite distinct from what experts do While many have used these results as a starting point for teaching students how to be expert the author has chosen instead to ask about the interrelationship between expert and novice practice seeing them both as two sides of the same project a cultural historical professionalization project aimed at establishing and preserving the professional privilege The consequences of this professionalization project are examined using the discipline of academic philosophy as the site for the author's investigations Methodologically unique these investigations combine rhetorical analysis protocol analysis and the analysis of classroom discourse The result is a complex

portrait of how the participants in this humanistic discipline use their academic literacy practices to construct and reconstruct a great divide between expert and lay knowledge This monograph thus extends our current understanding of the rhetoric of the professions and examines its implications for education **Information Technology and Applied**

Aha,2024-01-22 This book focuses on a subtopic of explainable AI XAI called explainable agency EA which involves producing records of decisions made during an agent s reasoning summarizing its behavior in human accessible terms and providing answers to questions about specific choices and the reasons for them We distinguish explainable agency from interpretable machine learning IML another branch of XAI that focuses on providing insight typically for an ML expert concerning a learned model and its decisions In contrast explainable agency typically involves a broader set of AI enabled techniques systems and stakeholders e g end users where the explanations provided by EA agents are best evaluated in the context of human subject studies The chapters of this book explore the concept of endowing intelligent agents with explainable agency which is crucial for agents to be trusted by humans in critical domains such as finance self driving vehicles and military operations This book presents the work of researchers from a variety of perspectives and describes challenges recent research results lessons learned from applications and recommendations for future research directions in EA The historical perspectives of explainable agency and the importance of interactivity in explainable systems are also discussed Ultimately this book aims to contribute to the successful partnership between humans and AI systems Features Contributes to the topic of explainable artificial intelligence XAI Focuses on the XAI subtopic of explainable agency Includes an introductory chapter a survey and five other original contributions Handbook on Thermal Hydraulics in Water-Cooled Nuclear Reactors Francesco D'Auria,Yassin A. Hassan,2024-07-29 Handbook on Thermal Hydraulics of Water Cooled Nuclear Reactors Volume 3 Procedures and Applications includes all new chapters which delve deeper into the topic adding context and practical examples to help readers apply learnings to their own setting Topics covered include experimental thermal hydraulics and instrumentation numerics scaling and containment in thermal hydraulics as well as a title dedicated to good practices in verification and validation This book will be a valuable reference for graduate and undergraduate students of nuclear or thermal engineering as well as researchers in nuclear thermal hydraulics and reactor technology engineers working in simulation and modeling of nuclear reactors and more In addition

nuclear operators code developers and safety engineers will also benefit from the practical guidance provided Presents a comprehensive analysis on the connection between nuclear power and thermal hydraulics Includes end of chapter questions quizzes and exercises to confirm understanding and provides solutions in an appendix Covers applicable nuclear reactor safety considerations and design technology throughout *Words and Worlds* ,2009-01-01 In this book the reader is invited to enter a strange world in which you can tell the age of the captain by counting the animals on his ship where runners do not get tired and where water gets hotter when you add it to other water It is the world of a curious genre known as word problems or story problems It originated in the ancient civilizations of Egypt China and India and is the subject of daily rituals among students and teachers in mathematics classrooms all around the world An international group of scholars with a shared interest in this phenomenon explore multiple aspects of this world from multiple perspectives These discussions take us deep into philosophical issues of the relationships between words mathematical systems and the physical and social worlds we all inhabit Empirical investigations are reported that throw light on how students and their teachers experience and interpret this activity raising profound questions about the nature and purposes of mathematics teaching learning in general and how it could be improved

Artificial Psychology Clayton Lewis,2025-02-19 The success of predictive large language models PLLMs like GPT3 and ChatGPT has created both enthusiasts and skeptics of their widespread practical applications but this book argues that the larger significance of such models is contained in what they suggest about human cognition To explore this potential the book develops a thought experiment called the Prediction Room a reference to John Searle s influential Chinese Room argument in which a human agent processes language by following a set of opaque written rules without possessing an inherent understanding of the language The book proposes a new Room model the Prediction Room with its resident Prediction Agent generalizing the working of large language models Working through a wide range of topics in cognitive

science the book challenges the conclusion of Searle's thought experiment that discredited contemporary artificial intelligences AI through the suggestion that the Prediction Room offers a means of exploring how new ideas in AI can provide productive alternatives to traditional understandings of human cognition In considering the implications of this the book reviews an array of topics and issues in cognitive science to uncover new ideas and reinforce older ideas about the mental mechanisms involved in both sides The discussion of these topics in the book serves two purposes First it aims to stimulate new thinking about familiar topics like language acquisition or the nature and acquisition of concepts Second by contrasting human psychology with the form of artificial psychology these models exhibit it uncovers how new directions in the development of these systems can be better explored

Chatgpt and Other Generative AI Tools Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT

have been used to generate teaching materials or assessment tasks across different subjects. The field's understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy. GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content. However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution. Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies.
