Large-Scale Studies in Mathematics

Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Response to Intervention in Math Paul J. Riccomini, Bradley S. Witzel, 2010 Provides educators with instructions on applying response to intervention RTI while teaching and planning curriculum for students with learning disabilities

Teaching Reading Barbara M. Taylor, P. David Pearson, 2005-04-11 This unique book tells the story of a select group of schools and teachers who have managed to beat the odds in terms of improving elementary students reading achievement Originating with the CIERA School Change Project directed by Barbara Taylor and David Pearson it was subsequently expanded to include the work of other research teams doing similar work It combines large scale studies of effective schools and teachers Part I with case studies of individual schools and teachers who have successfully transformed research findings into situation specific strategies appropriate to their schools and classrooms Parts II and III The book s distinct contribution is showing that no matter how consistent the research findings on effective school and classroom practice groups of teachers must improvise their own situation specific programs and practices In short they must be able to create variations on a common theme Key features of this outstanding new volume include Integration of research and cases One cannot fully understand research based general principles without knowing how they play themselves out in specific settings Similarly one cannot fully understand cases without seeing the commonalities across different schools and classrooms sharing similar goals This book provides both perspectives Diverse cases The schools and classrooms depicted in this book are urban rural and suburban poor and middle class and English only and bilingual Rather than telling readers how to beat the odds it provides them with a wide variety of cases from which they can extrapolate to build their own customized teaching programs and practices Summarizing section The final section contains a summary of research on effective schools and teachers and a

concluding chapter by Gerry Duffy and Jim Hoffman in which they reflect on the book's content and possible directions for future research. The book is targeted to both in-service elementary teachers and literacy students in advanced college courses.
