**Precambrian Sedimentary Environments** Wladyslaw Altermann,Patricia Corcoran,2009-03-05 The motivation for this volume came from the idea that the Precambrian is the key both to the present and to the understanding of the Earth as a whole The Precambrian constitutes about 85% of Earth s history and of that about 3 75 billion years of Precambrian time represented by rocks are accessible to geoscientists Ancient atmospheric and environmental conditions can be traced back to the time when the Earth was only about 250 million years old Precambrian rocks supply almost 75% of important mineral resources such as Fe Mn Au Pt and Cr Many of these elements are associated with sedimentary rocks and some important hydrocarbon coal and graphite deposits are also hosted by Precambrian rocks This volume is aimed at geoscientists

interested in Precambrian sedimentary rocks and at students of Earth history It contains review articles discussing Precambrian conditions and case studies from Precambrian shields and successions of North and South America Australia Africa Europe Asia and India The introductory papers written by experts on Precambrian environments treat comprehensively the application of actualism to the Precambrian the evolution and influence of life on the sedimentary rock record the genesis of Banded Iron Formations the Precambrian sulphur cycle and the significance of Precambrian chemical carbonate precipitates The case studies include depositional settings and processes in Archean terranes in Paleoproterozoic sequences with some emphasis on the lack of vegetation and weathering and in late Proterozoic sequences with some emphasis on glacial deposits The contributions demonstrate that Precambrian sedimentary deposits are commonly similar to their Phanerozoic counterparts in terms of composition sedimentary processes and depositional setting but may differ significantly as a result of lack of vegetation climatic and biological constraints composition and circulation of seawater and the secular involvement of continental crust Contains review articles discussing Precambrian conditions and case studies from Precambrian shields and successions of North and South America Australia Africa Europe Asia and India The introductory papers written by experts on Precambrian environments treat comprehensively the application of actualism to the Precambrian the evolution and influence of life on the sedimentary rock record the genesis of Banded Iron Formations the Precambrian sulphur cycle and the significance of Precambrian chemical carbonate precipitates Detailed case studies include depositional settings and processes in Archean terranes in Paleoproterozoic sequences with some emphasis on the lack of vegetation and weathering and in late Proterozoic sequences with some emphasis on glacial deposits Written for geoscientists interested in Precambrian sedimentary rocks and students of Earth history If you are a member of the International Association of Sedimentologists IAS for purchasing details please see <http://www.iasnet.org/publications/details.asp?code=SP33>

*State and Society in the Palaiologan Era* Marie-Hélène Blanchet, Raúl Estangüí Gómez, 2025-04-09 Often described as a period of decline and decadence the history of the Byzantine Empire under the emperors of the Palaiologan dynasty 1261–1453 has undergone a considerable historiographical revival that has allowed this deeply negative image to be nuanced State and Society in the Palaiologan Era brings together articles by some of the best specialists in the field and addresses various aspects of the functioning of the Byzantine state and society in the Palaiologan period These contributions reflect not only the dynamism of the Byzantine society but also the divisions and challenges created by the deep transformations in the socioeconomic conditions of the time and by the Ottoman conquest of the Byzantine territory They show the capacity of the Byzantine state and institutions to adapt to a new political context one of territorial shrinkage and instability as well as the consequences of this instability for the society of the time for its economic and charitable activities for its spirituality and beliefs and for the splits and conflicts opposing different categories of social actors This book aims to provide researchers with a series of studies whose methodology and results offer new insights into the complex often contradictory phenomena that ran through

the Byzantine world during the Palaiologan period This collection of chapters will thus prove useful to all those interested in the Byzantine Empire at the end of the Middle Ages    **Oceanography and Marine Biology** R. N. Gibson,R. J. A.
