Jeffries, 2017-03-17 In 1940 for the first time since America's founding a sitting president sought a third term in office But this was only one remarkable aspect of that year's election which was as John Jeffries makes clear in his new book one of the

most interesting and important elections in American history Franklin Roosevelt's plan to pack the Supreme Court had failed in the wake of a recent recession his New Deal had hardened support and opposition among both parties and the German advance across Europe along with Japanese aggression in Asia was stirring fierce debate over America's role in the world Adding to the moment of profound uncertainty was FDR's procrastination over whether to run again Jeffries explores how these tensions played out and what they meant not just for the presidential election but also for domestic politics and policy generally and for state and local contests In the context of the Roosevelt Coalition and the New Deal party system he parses the debates and struggles within both the Democratic and Republican parties as Roosevelt deliberated over running and Wendell Wilkie a businessman from Indiana and New York City got the nod from Republicans over a field including the rising moderate Thomas E Dewey the conservative Michigan senator Arthur Vandenburg and the isolationist Ohio senator Robert Taft A Third Term for FDR reveals how domestic policy more than international events influenced Roosevelt's decision to run and his victory in November A detailed analysis of the results offers insights into the impact of the year's events on voting and into the election's long term implications and ramifications many of which continue to this day
