Critical Appraisal Skills for Healthcare Students Charlotte J. Whiffin, Donna Barnes, Lorraine Henshaw, 2024-03-11 Are you struggling to make sense of complex research papers and craft insightful critiques for your academic assignments Then look no further *Critical Appraisal Skills for Healthcare Students* is your indispensable guide to understanding research papers mastering critical appraisal and most importantly succeeding in your summative assignments While this text is written with Level 5 students in mind you will find it is a useful text at any academic level when required to engage in evidence based practice In today s ever evolving healthcare system the ability to critically appraise research evidence is crucial In pre registration programmes this core skill is often assessed through written assignments However students can struggle not only to interpret research papers and evaluate their quality but also to write about this appraisal in an academic way This comprehensive textbook equips healthcare students with the evidence skills they need while also enhancing their ability to produce high quality assignments Authored by experienced academics with over two decades of teaching research and evidence based practice this text covers core topics such as The significance of evidence in practice locating and selecting appropriate literature and navigating assignments based on the appraisal of research Strategies for reading research papers and understanding them before appraisal The fundamentals of critiquing research with Key Fact sheets summarising the design issues of specific types of research How to move beyond EBP for academic assessment towards using evidence in everyday professional practice *Critical Appraisal Skills for Healthcare Students* is an excellent core text to master the art of critical appraisal and enhance academic performance

Scientific and Technical Aerospace Reports, 1979 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database

Of Trees and Clouds Franziska Weidle, 2020-05-11 Software based technologies deeply saturate our everyday

lives Consequently they also influence the ways we see and mediate the world In fact the ease and flexibility software provides implies a shift in control Digital media mediates itself turning software into a co author Yet the potentials of such a co authorship are still largely constrained by conventions stemming from the need to run strips of celluloid through a projector This book demonstrates how software can retrain filmmakers visions of the world from branching trees to the shifting contours of clouds It does so by ethnographically studying one particular technology the Korsakow System The result is a methodology for interrogating established software regimes a task increasingly in need of anthropological attention
