Punter Net Field Report:

The XX Factor Alison Wolf, 2013-04-25 For most of history being female defined the limits of a woman's achievements. But now women are successful careerists equal to men. In Norway women legally must constitute a third of all boards. In America women have gone from 3% of practising lawyers in 1970 to 40% today and over half of all law students. These changes are revolutionary but not universal: the sisterhood of working women is deeply divided. Making enormous strides in the workplace are young educated full-time professionals who have put children on hold. But for a second group of women this is unattainable; instead they work part-time, earn less, are concentrated in heavily feminised occupations like cleaning and gain income and self-worth from having children young. As these two groups move ever further apart, shared gender no longer automatically creates interests in common with other women. **The XX Factor** lifts the curtain on these social, cultural and economic schisms.

Cybercrime Robert Moore, 2014-09-25 This innovative text provides an excellent introduction to technology-assisted crime and the basics of investigating such crime from the criminal justice perspective. It presents clear, concise explanations for students and professionals who need not be technically proficient to find the material easy to understand and practical. The book begins by identifying and defining the most prevalent and emerging high technology crimes and exploring their history, their original methods of commission and their current methods of commission. Then it delineates the requisite procedural issues associated with investigating technology-assisted crime. In addition, the text provides a basic introduction to computer forensics, explores legal issues in the admission of digital evidence and then examines the future of high technology crime including legal responses.

Remote Relationships in a Small World Samantha Holland, 2008 How do people have relationships when they are apart or develop them when they've never even met? From MySpace and weblogs to romance and sexuality, this book draws together a range of studies on remote relationships, investigating the intricate, intimate ways that people forge connections online. The term remote refers to the technologies that facilitate forms of communication and also underlines the lack of physicality involved in these relationships developed at a distance. Using empirical data, these collected essays explore a wide variety of relationships, examining the methodological and ethical issues that researchers face. **Remote Relationships in a Small World**, part of a new generation of online studies, responds to the need for research that focuses on social relationships.

Sex Trafficking Tsachi Keren-Paz, 2013-06-07 **Sex Trafficking: A Private Law Response** examines existing and potential causes of action against sex traffickers, clients and the state and argues for fair and effective private law remedies. Combining a theoretical inquiry about the borders of liability in torts and restitution with a political commitment to protecting the interests of victims of sex trafficking, this book offers a comparative doctrinal and socio-legal analysis of private law remedies, their justification and their effectiveness. Tsachi Keren-Paz innovatively and convincingly makes the argument that all those directly involved in breaching the rights of victims of sex trafficking should compensate them for their losses and make restitution of the profits.

made at their expense Sex Trafficking A Private Law Response will be invaluable to both academics and practitioners concerned with prostitution modern slavery and trafficking and those interested in private law theory and practice
