

## SVERKER 750™/760™

### Relay Test Unit

The Sverker 750/760™ Relay Test Unit is the engineer's toolbox. The control panel features a logical layout, still SVERKER 650™ users will find it comfortably familiar and will be able to start work right away.

The SVERKER 750/760™ features many functions that make relay testing more efficient. For example, its powerful measurement section can display (in addition to time, voltage and current)  $Z$ ,  $R$ ,  $X$ ,  $S$ ,  $P$ ,  $Q$ , phase angle and  $\cos \varphi$ . The voltmeter can also be used as a 2nd ammeter (when testing differential relays for example). All values are presented on a single easy-to-read display.

You can also test directional protective equipment efficiently by means of the built-in variable voltage source. In SVERKER 760™ this has a continuous phase shift function as well. Automatic reclosing devices can also be tested – just as easily.

Designed to comply with EU standards and other personal and operational safety standards, SVERKER 750/760™ is also equipped with a serial port for communication with personal computers and the PC software SVERKER Win™. Since the compact SVERKER™ weighs only 18 kg (39 lbs), it's easy to move from site to site.

Two or more SVERKER™ units can also be synchronized, which for example allows the user to connect three SVERKER™ into a basic 3-phase test set.
