A phylogenetic tree visually represents a hypothesis of how a group of organisms are related. This figure explores how the way a tree is drawn conveys information.

Instructors: Additional questions related to this Visualizing Figure can be assigned in MasteringBiology.

Parts of a Tree

This tree shows how the five groups of organisms at the tips of the branches, called taxa, are related. Each branch point represents the common ancestor of the evolutionary lineages diverging from it.

This branch point represents the common ancestor of all the animal groups shown in this tree.

- 1 According to this tree, which group or groups of organisms are most closely related to frogs?
- 2 Label the part of the diagram that represents the most recent common ancestor of frogs and humans.

Fishes

Frogs

Lizards

Chimps

Humans

Each horizontal branch represents an evolutionary lineage. The length of the branch is arbitrary unless the diagram specifies that branch lengths represent information such as time or amount of genetic change (see Figure 26.13).

Each position along a branch represents an ancestor in the lineage leading to the taxon named at the tip.

Sister taxa are groups of organisms that share a common ancestor that is not shared by any other group. Chimps and humans are an example of sister taxa in this tree.

Alternative Forms of Tree Diagrams

These diagrams are referred to as “trees” because they use the visual analogy of branches to represent evolutionary lineages diverging over time. In this text, trees are usually drawn horizontally, as shown above, but the same tree can be drawn vertically or diagonally without changing the relationships it conveys.

Fishes Frogs Lizards Chimps Humans

Fishes Frogs Lizards Chimps Humans

Vertical tree

- 3 How many sister taxa are shown in these two trees? Identify them.

- 4 Redraw the horizontal tree in Figure 26.2 as a vertical tree and a diagonal tree.

Diagonal tree

Rotating Around Branch Points

Rotating the branches of a tree around a branch point does not change what they convey about evolutionary relationships. As a result, the order in which taxa appear at the branch tips is not significant. What matters is the branching pattern, which signifies the order in which the lineages have diverged from common ancestors.

Note: The order of the taxa does NOT represent a sequence of evolution “leading to” the last taxon shown (in this tree, humans).

Rotating the branches in the tree at left around the three blue branch points yields the tree on the right.

- 5 Redraw the tree on the right, rotating around the green branch point. Identify the two closest relatives of humans as shown in each of the three trees. Explain your answer.

Uncertainty and Graphing in Discovery Work Wolff-Michael Roth,2014-08-08 This book deals with uncertainty and graphing in scientific discovery work from a social practice perspective It is based on a 5 year ethnographic study in an advanced experimental biology laboratory The book shows how in discovery work where scientists do not initially know what to make of graphs there is a great deal of uncertainty and scientists struggle in trying to make sense of what to make of graphs Contrary to the belief that scientists have no problem interpreting graphs the chapters in this book make clear that uncertainty about their research object is tied to uncertainty of the graphs It may take scientists several years of struggle in their workplace before they find out just what their graphs are evidence of Graphs turn out to stand to the entire research in a part whole relation where scientists not only need to be highly familiar with the context from

which their data are extracted but also with the entire process by means of which the natural world comes to be transformed and represented in the graph This has considerable implications for science technology engineering and mathematics education at the secondary and tertiary level as well as in vocational training This book discusses and elaborates these implications **PISA Sample Tasks from the PISA 2000 Assessment Reading, Mathematical and Scientific Literacy**
