CityEngine, Manual Práctico Rafael Ramón Temes Cordovez, Alfonso Moya Fuero, 2019-11-20. En los últimos años ha vuelto a resurgir con fuerza la revisión a los patrones a partir de la arquitectura y el urbanismo paramétrico. El término paramétrico proviene de las matemáticas y se refiere al uso de variables que permiten manipular o alterar el resultado final de una ecuación o sistema. El diseño paramétrico es un paradigma de diseño en el cual la relación entre los elementos se utiliza para manipular y comunicar el diseño de geometrías y estructuras complejas. Así, el urbanismo paramétrico es aquel basado en patrones o rutinas de crecimiento y evolución predefinidas que pueden combinarse y adaptarse de manera lógica a cada una de las geometrías que se propongan. Esto facilita la exploración de múltiples alternativas generando todo un rango de posibles soluciones. En tal sentido, la aplicación de estas técnicas permite reducir esfuerzos eliminando tareas repetitivas para valorar diferentes escenarios. Hoy en día uno de los mejores softwares basados en un lenguaje o gramática de generación paramétrica de formas es CityEngine. Su propio lenguaje denominado Computer Generated Architecture (CGA) es la base de este funcionamiento evolutivo que permite infinitas posibilidades. El presente libro tiene el propósito de ofrecer al lector una primera aproximación práctica a este mundo a través de CityEngine. Nuestra experiencia en el uso de este software de ESRI se deriva del Máster en Sistemas de Información Geográfica aplicada a la ordenación del territorio del urbanismo y el paisaje (www.cursosigupv.com) que impartimos desde el año 2013 en la Universitat Politècnica de València. El libro contiene material adicional que podrá descargar accediendo a la ficha del libro en www.ra-ma.es.

Design Activism Alastair Fuad-Luke, 2013-06-17. Design academics and practitioners are facing a multiplicity of challenges in a dynamic complex world moving faster than the current design paradigm which is largely tied to the values and imperatives of commercial enterprise. Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students, teachers and professionals for the near future. New approaches, methods and tools are urgently required as sustainability expands the context for design and what it means to be a designer. Design activists, who comprise a diverse range of designers, teachers and other actors, are setting new ambitions for design. They seek to fundamentally challenge how, where and when design can catalyse positive impacts to address sustainability. They are also challenging who can utilise the power of the design process. To date, examination of contemporary and emergent design activism is poorly represented in the literature. This book will provide a rigorous exploration of design activism that will revitalise the design debate and provide a solid platform for students, teachers, design professionals and other disciplines interested in transformative design activism. Design Activism provides a comprehensive study of contemporary and emergent design activism. This activism has a dual aim to make positive impacts towards more sustainable

ways of living and working and to challenge and reinvigorate design praxis It will collate synthesise and analyse design activist approaches processes methods tools and inspirational examples outcomes from disparate sources and in doing so will create a specific canon of work to illuminate contemporary design discourse Design Activism reveals the power of design for positive social and environmental change design with a central activist role in the sustainability challenge Inspired by past design activists and set against the context of global local tensions expressions of design activism are mapped The nature of contemporary design activism is explored from individual collective action to the infrastructure that supports it generating powerful participatory design approaches a diverse toolbox and inspirational outcomes This is design as a political and social act design to enable adaptive societal capacity for co futuring

A New Perspective on Education in the Digital Age

Jesper Tække, Michael Paulsen, 2021-11-04 Drawing together action based research with sociology of education medium theory and the Bildung tradition the authors offer a new perspective on education in the digital age exploring emancipation edification self formation and democratic education The authors draw on 15 years of action based research and weave this with the theory to show how teachers and students might use new media for learning about interaction searching visualizing constructing storing and retrieving The authors show that education needs to be rethought resituated and developed anew in the digital age New norms and new ways of teaching need to be established Building on the theory and case studies they analyze and discuss different strategies ideas and understandings offering four promising ways to develop a new vision for education The open access edition of this book is available under a CC BY NC ND 3 0 licence on www.bloomsburycollections.com Open access was funded by Aarhus University

Invisible Reconstruction

Lucia Patrizio Gunning, Paola Rizzi, 2022-12-06 What does it really mean to reconstruct a city after a natural biological or man made disaster Is the repair and reinstatement of buildings and infrastructure sufficient without the mending of social fabric The authors of this volume believe that the true measure of success should be societal After all a city without people is no city at all Invisible Reconstruction takes the view that effective disaster mitigation and recovery require interdisciplinary tactics Historian Lucia Patrizio Gunning and urbanist Paola Rizzi expand beyond the confines of individual disciplines or disaster studies to bring together academics and practitioners from a wide variety of disciplines comparing strategies and outcomes in different scenarios and cultures from South America Europe and Asia From cultural heritage and public space to education and participation contributors reflect on the interconnection of people culture and environment and on constructive approaches to strengthening the intangible ties to increase resilience and reduce vulnerability By bringing practical examples of how communities and individuals have reacted to or prepared for disaster the publication proposes a shift in public policy to ensure that essential physical reinforcement and rebuilding are matched by attention to societal needs Invisible Reconstruction is essential reading for policymakers academics and practitioners working to reduce the impact of natural biological and man made disaster or to improve post disaster recovery
