Ultra-Wideband and 60 GHz Communications for Biomedical Applications Mehmet R. Yuce, 2013-10-16. This book investigates the design of devices, systems and circuits for medical applications using the two recently established frequency bands: ultra wideband 3.1-10.6 GHz and 60 GHz ISM band. These two bands provide the largest bandwidths available for communication technologies and present many attractive opportunities for medical applications. The applications of these bands in healthcare are: wireless body area network (WBAN), medical imaging, biomedical sensing, wearable and implantable devices, fast medical device connectivity, video data transmission and vital signs monitoring. The recent technological advances and developments proposed or used in medicine based on these two bands are covered. The book introduces possible solutions and design techniques to efficiently implement these systems in medical environment. All individual chapters are written by leading experts in their fields. Contributions by authors are on various applications of ultra wideband and the 60 GHz ISM band including circuit implementation, UWB and 60 GHz signal transmission, antenna and in-body antenna design, solution hardware implementation of body sensors, UWB transceiver design, 60 GHz transceiver design, UWB radar for contactless respiratory monitoring and ultra wideband based medical imaging.
