Supplementary Timetable For February March 2015:

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do **National Audit Office - Department for Education: Establishing Free Schools - HC 881**

Great Britain: National Audit Office, 2013-12-11 This report finds that the Department for Education has made clear progress in implementing its Free Schools programme by opening 174 such schools since 2010 Many of these Free Schools new all ability state schools set up following proposals from different groups and as academies funded directly by the Department for Education have been established quickly and at relatively low cost and the Department's assessment of proposals has improved However the primary factor in decision making has been opening schools at pace rather than maximizing value for money The Department is now establishing a wider approach on how it could maximize its benefits in deciding on which schools to approve At 6.6 million a school the average unit cost of premises is now more than double the Department's original planning assumption though the current assumption now reflects actual costs Because the programme is demand led there is uncertainty about types of schools and where they will be located Most primary Free Schools are in areas that need extra school places but there have been no applications in half of all districts with high or severe forecast need for school places Overall Free Schools opened with three quarters of planned admissions in their first year but there have been significant variations between schools Oversight of the schools has evolved but serious financial management and governance concerns highlighted in two recent investigations by the Education Funding Agency highlight the risks in some schools and the need systematically to address lessons learned as the programme develops **Arbitration Concerning the South China Sea** Shicun Wu, Keyuan Zou, 2016-03-02 On 22 January 2013 the Republic of the Philippines instituted arbitral proceedings against the People's Republic of China PRC under the United Nations Convention on the Law of the Sea

year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers

lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place **Fragile Rights**
