developments in specialties outside their own The Safety of Controllers, Sensors, and Actuators Juan Pimentel, 2019-03-07 Safety has been ranked as the number one concern for the acceptance and adoption of automated vehicles since safety has driven some of the most complex requirements in the development of self driving vehicles Recent fatal accidents involving self driving vehicles have uncovered issues in the way some automated vehicle companies approach the design testing verification and validation of their products Traditionally automotive safety follows functional safety concepts as detailed in the standard ISO 26262 However automated driving safety goes beyond this standard and includes other safety concepts such as safety of the intended functionality SOTIF and multi agent safety The Safety of Controllers Sensors and Actuators addresses the concept of safety for self driving vehicles through the inclusion of 10 recent and highly relevant SAE technical papers Topics that these papers feature include risk reduction techniques in semiconductor based systems component certification and safety assessment and audits for vehicle components As the fifth title in a series on automated vehicle safety this contains introductory content by the Editor with 10 SAE technical papers specifically chosen to illuminate the specific safety topic of that book *Communication and Intelligent Systems* Jagdish Chand Bansal, Mukesh Kumar Gupta, Harish Sharma, Basant Agarwal, 2020-04-09 This book gathers selected research papers presented at the International Conference on Communication and Intelligent Systems ICCIS 2019 organised by Swami Keshvanand Institute of Technology Management Gramothan SKIT Jaipur India and Rajasthan Technical University Kota India on 9-10 November 2019 This book presents a collection of state of the art research work involving cutting edge technologies for communication and intelligent systems Over the past few years advances in artificial intelligence and machine learning have sparked new research efforts around the globe which explore novel ways of developing intelligent systems and smart communication technologies The book presents single and multi disciplinary research on these themes in order to make the latest results available in a single readily accessible source *Methods, Models and Tools for Fault Tolerance* Michael Butler, Cliff B. Jones, Alexander Romanovsky, Elena Troubitsyna, 2009-03-03 The growing complexity of modern software systems increases the difficulty of ensuring the overall dependability of software intensive systems Complexity of environments in which systems operate high dependability requirements that systems have to meet as well as the complexity of infrastructures on which they rely make system design a true engineering challenge Mastering system complexity requires design techniques that support clear thinking and rigorous validation and verification Formal design methods help to achieve this Coping with complexity also requires architectures that are tolerant of faults and of unpredictable changes in environment This issue can be addressed by fault tolerant design techniques Therefore there is a clear need of methods enabling rigorous modelling and development of complex fault tolerant systems This book addresses such acute issues in developing fault tolerant systems as Verification and refinement of fault tolerant systems Integrated approaches to developing fault tolerant systems Formal foundations for error detection error recovery exception and fault handling Abstractions styles and patterns for

rigorous development of fault tolerance Fault tolerant software architectures Development and application of tools supporting rigorous design of dependable systems Integrated platforms for developing dependable systems Rigorous approaches to specification and design of fault tolerance in novel computing systems The editors of this book were involved in the EU FP 6 project RODIN Rorous Open Development Environment for Complex Systems which brought together researchers from the fault tolerance and formal methods communities In 2007 RODIN organized the MeMoT workshop held in conjunction with the Integrated Formal Methods 2007 Conference at Oxford University
