Survival Of The Sickest The Surprising Connections:

Survival of the Sickest Sharon Moalem, 2008 Joining the ranks of modern myth busters Dr Sharon Moalem turns our current understanding of illness on its head and challenges us to fundamentally change the way we think about our bodies and our health By re examining evolutionary history Dr Moalem reveals how many of the conditions that are diseases today actually gave our ancestors a leg up in the survival sweepstakes It goes on to demonstrate just how little modern medicine really understands about human health and offers a new way of thinking that can help all of us live longer healthier lives

Back cover **Angst** Jeffrey P. Kahn, 2013 With so many afflicted by the slings and arrows of outrageous angst its true origin has remained mysterious A new theoretical synthesis suggests that while animals share a set of evolved social instincts we humans experience commonplace Anxiety and Depressive disorders when we use our reason to defy that biology The

Better Half Shāron Moalem, 2020-04-07 A Guardian Book of the Week Longlisted for the PEN E O Wilson Literary Science Writing Award An award winning physician and scientist makes the game changing case that genetic females are stronger than males at every stage of life Here are some facts Women live longer than men They have stronger immune systems They re better at fighting cancer and surviving famine and even see the world in a wider variety of colors They are simply stronger than men at every stage of life Why is this And why are we taught the opposite To find out Dr Sharon Moalem drew on his own medical experiences treating premature babies in the neonatal intensive care unit recruiting the elderly for neurogenetic studies tending to HIV positive orphans in Thailand and tried to understand why in every instance men were consistently less likely to thrive The answer he discovered lies in our genetics two X chromosomes offer a powerful survival advantage With clear captivating prose that weaves together eye opening research case studies diverse examples ranging from the behavior of honeybees to American pioneers as well as experiences from his personal life and his own patients Moalem explains why genetic females triumph over males when it comes to resiliency intellect stamina immunity and much more He also calls for a reconsideration of our male centric one size fits all view of medical studies and even how we prescribe medications a view that still sees women through the lens of men Revolutionary and yet utterly convincing *The Better Half* will make you see humanity and the survival of our species anew *The Matter of Disability* David T.

Mitchell, Susan Antebi, Sharon L. Snyder, 2019-05-01 *The Matter of Disability* returns disability to its proper place as an ongoing historical process of corporeal cognitive and sensory mutation operating in a world of dynamic even cataclysmic change The book s contributors offer new theorizations of human and nonhuman embodiments and their complex evolutions in our global present in essays that explore how disability might be imagined as participant in the complex elaboration of difference rather than something gone awry in an otherwise stable process This alternative approach to materiality sheds new light on the capacities that exist within the depictions of disability that the book examines including Spider Man Of Mice and Men and Bloodchild **Oxford Textbook of Spirituality in Healthcare** Mark Cobb, Christina Puchalski, Bruce

Rumbold,2012-08-09 The relationship between spirituality and healthcare is historical intellectual and practical and it has now emerged as a significant field in health research healthcare policy and clinical practice and training Understanding health and wellbeing requires addressing spiritual and existential issues and healthcare is therefore challenged to respond to the ways spirituality is experienced and expressed in illness suffering healing and loss If healthcare has compassionate regard for the humanity of those it serves it is faced with questions about how it understands and interprets spirituality what resources it should make available and how these are organised and the ways in which spirituality shapes and informs the purpose and practice of healthcare These questions are the basis for this resource which presents a coherent field of enquiry discussion and debate that is interdisciplinary international and vibrant There is a growing corpus of articles in medical and healthcare journals on spirituality in addition to a wide range of literature but there has been no attempt so far to publish a standard text on this subject Spirituality in Healthcare is an authoritative reference on the subject providing unequalled coverage critical depth and an integrated source of key topics Divided into six sections including practice research policy and training the project brings together international contributions from scholars in the field to provide a unique and stimulating resource

Political Tribalism Allen Buchanan,2025-05-06 Combining hard data with the author s personal story of a life in the U S South and then as a university professor this book sheds a new light on tribalistic ideologies Such ideologies are a deeply troubling feature of civic life in America and in many Western democracies as they erode trust among citizens sow divisions and pervert a larger pursuit of truth and understanding Philosopher Allen Buchanan weaves together his own autobiography with the latest research in psychology politics anthropology and philosophy to better understand the nature and causes of ideological tribalism its pernicious effects on the individual and society and the best possible solutions for curbing its spread The story begins with Buchanan as a middle class White boy in 1950s Arkansas absorbing and espousing the racist ideas of his parents church and community This beginning intentionally inculcates the author in subsequent criticisms of tribalism and because Buchanan left this world and came to reject its values makes convincing his arguments at the book s conclusion on how to escape tribalism s tight grasp Before offering such final prescriptions Buchanan examines the evolutionary origins of tribalistic thinking and shows how unyielding group ideologies short circuit truth seeking attack the meaning and purpose of a liberal education undermine a shared national identity and thanks to social media prop up a shallow and false self identity With a sharp eye toward tribalistic ideologies on the Right and the Left *Political Tribalism How it Hijacks Our Minds and Diminishes Our Humanity* is a compelling call for a healthier and deeper intellectual life of a democracy s polity and for its individual citizens

Joining the ranks of modern myth busters Dr Sharon Moalem turns our current understanding of illness on its head and challenges us to fundamentally change the way we think about our bodies our health and our relationship to just about every other living thing on earth from plants and animals to insects and bacteria So why does disease exist Moalem proposes that most common ailments diabetes hemochromatosis cystic fibrosis sickle cell anemia came into existence for very good reasons At some point they helped our ancestors survive some grand challenge to their existence Examining the evolution of man Moalem reveals the role genetic and cultural differences have played in the health and well being of various races including their susceptibility to disease With mesmerizing insight Moalem offers groundbreaking insight into How diabetes may be a byproduct of a mechanism that helped humans survive the Ice Age Why African Americans living in the north might suffer from vitamin D deficiencies Why Asians can t drink as much alcohol as Europeans Revelatory utterly engaging and timely Moalem ponders strongN1 the emerging Avian Flu virus Why Redheads Feel More Pain and Asians Can t Drink will irrevocably change the way we think about our bodies and ourselves **Pandora's Box** Geoffrey Newton,2023-05-18 This book is about the coronavirus and the pandemic it spawned and what this outbreak means for future pandemics It analyses the official response and sees where improvements can be made for example the World Health Organization waited till March to designate the coronavirus a pandemic and a full year before confirming its airborne transmission The book looks at the specific nature of the virus its origins and how it was transmitted why it was so deadly to predisposed individuals how it compares to previous pandemics what measures were taken mitigate the disease and how to protect ourselves against it in future The book also looks into the wider implications of the pandemic and its causes for example how climate change and biodiversity are coming into direct conflict with ever expanding needs of population growth and urban sprawl has conspired to bring us into ever closer contact with these viruses for example Nipah virus outbreak from the deforestation of the Indonesian Rain Forest and Ebola from settlement expansion in the Congo Lastly the book looks at the wider nature of viruses and their historical significance to the tree of life of the planet and their relationship to our evolution This book is a timely search into the nature of viruses and how they will affect us going forward and what measures we can take to protect

ourselves and mitigate the dangers from future outbreaks by integrating our industrial society into an ecological friendly setting thereby accommodating these viruses The Bloomsbury Handbook of Posthumanism Mads Rosendahl

Thomsen, Jacob Wamberg, 2022-04-21 As our ideas of the human have come under increasing challenges from technological change from medical advances from the existential threat of climate crisis from an ideological decentering of the human amongst many other things the posthuman has become an increasingly central topic in the Humanities Bringing together leading scholars from across the world and a wide range of disciplines this is the most comprehensive available survey of cutting edge contemporary scholarship on posthumanism in literature culture and theory The Bloomsbury Handbook of Posthumanism explores Central critical concepts and approaches including transhumanism new materialism and the Anthropocene Ethical perspectives on ecology race gender and disability Technology from data and artificial intelligence to medicine and genetics A wide range of genres and forms from literary and science fiction through film television and music to comics video games and social media *The 101 Most Unusual Diseases and Disorders* Evelyn B. Kelly, 2015-11-23 This book explores serious diseases and disorders that most readers have never heard of ranging from genetic infectious and environmental diseases to autoimmune idiopathic and mental disorders Despite centuries of scientific study and medical research there are still many human diseases and disorders that remain difficult to manage or are incurable Some of these maladies are extremely rare yet together they affect a substantial number of people The 101 Most Unusual Diseases and Disorders examines seldom seen illnesses providing high school and college students with an excellent resource for research as well as supplying fascinating reading for general readers interested in diseases and medical science This book provides clear easy to understand and scientifically grounded information on the vast number of unusual medical conditions that have been recorded covering five kinds of diseases and disorders genetic infectious environmental mental and other which constitutes diseases of autoimmune and unknown origin Examples of the medical conditions addressed include autoimmune encephalitis Ebola kleptomania Morgellons syndrome orthorexia pneumoconiosis and Prader Willi syndrome Selected case studies enable readers to better empathize with the experiences of those who have these disorders and how these afflictions have affected their lives A Cultural History of Disability in the Modern Age David T. Mitchell, Sharon L. Snyder, 2023-05-17 If eugenics the science of eliminating kinds of undesirable human beings from the species record came to overdetermine the late 19th century in relation to disability the 20th century may be best characterized as managing the repercussions for variable human populations A Cultural History of Disability in the Modern Age provides an interdisciplinary overview of disability as an outpouring of professional political and representational efforts to fix correct eliminate preserve and even cultivate the value of crip bodies This book pursues analyses of disability s deployment as a wellspring for an alternative ethics of living in and alongside the body different while simultaneously considering the varied social and material contexts of devalued human differences from World War I to the present In short this volume demonstrates that in

Ozymandias like ways the Western Project of the Human with its perpetuation of body mind hierarchies lies crumbling in the deserts of failed empires genocidal furies and the rejuvenating myths of new nation states in the 20th century An essential resource for researchers scholars and students of history literature culture philosophy rehabilitation technology and education A Cultural History of Disability in the Modern Age explores such themes and topics as atypical bodies mobility impairment chronic pain and illness blindness deafness speech learning difficulties and mental health while wrestling with their status as unreliable predictors of what constitutes undesirable humanity **The Science Teacher** ,2008 Wrath Sharon Moalem,Daniel Kraus,2022-10-11 New York Times bestselling coauthors Sh ron Moalem and Daniel Kraus s terrifying sci fi horror thriller takes place in a future that is much nearer than you think It is a world where scientific experimentation is exploited for commercial profit and under supervised cutting edge technology creates a menace that threatens the very fabric of our existence Wrath is the story of Sammy a lab rat instilled with human genes whose supersized intelligence helps him to engineer his escape into the world outside the lab a world vastly ill equipped to deal with the menace he represents Modified through advances that have boosted his awareness of humankind s cruelty in the name of science Sammy has the potential to sire a rodent army capable of viciously overwhelming the human race The key to Sammy s capture and humanity s salvation may be ten year old Dallas Underhill whom Sammy adopts But while Dallas and Sammy bond time is running out for humankind once Sammy sires his progeny the exponential proliferation of his kind could spell the end of the world For fans of dystopian works such as Jeff VanderMeer s Southern Reach Trilogy and Emily St John Mandel s Station Eleven and readers of Neal Stephenson Michael Crichton and Blake Crouch This heart pounding science based thriller takes place in a possibly all too soon reality where the hazards and consequences of genetic manipulation will no longer be the stuff of mere fiction Hardcover with dust jacket 320 pages 9 in H by 6 in W Foundations of Paleoparasitology Aauto Araújo,2014-01-01 Unprecedented initiative in the world the book compiles the available knowledge on the subject and presents the state of the art in paleoparasitology term coined about 30 years ago by Brazilian Fiocruz researcher Luiz Fernando Ferreira pioneer in this science which is concerned with the study of parasites in the past Multidisciplinary by essence paleoparasitology gathers contributions from social scientists biologists historians archaeologists pharmacists doctors and many other professionals either in biomedical or humanities fields With varied applications such as in evolutionary or migration studies their results often depend on the association between laboratory findings and cultural remains The book is divided into four parts Parasites Hosts and Human Environment Parasites Remains Preserved in Various Materials and Techniques in Microscopy and Molecular Diagnostics Parasite Findings in Archeological Remains a paleographic view and Special Studies and Perspectives Signed by authors from various countries such as Argentina USA Germany and France the book has chapters devoted to the discoveries of paleoparasitology on all continents The Atlantic Monthly ,2008 **ReFocus: The Films of Spike Jonze** Wilkins Kim Wilkins,2019-07-29 ReFocus The Films of Spike Jonze
