The Pynes Embark:

The Pynes Embark E. B. Smith, 2015-04-19 Dover is no longer safe for Fairfax Pyne Once her family name provided protection but around the city recently prejudice against people like Fairfax and her brother Greyson and sister Fennec has been intensifying Then their chance arrives in the form of a legendary ship about to launch from Dover to a new land a place where no one will know the Pyne s history or care about their bloodline The prospect of freedom seems to warrant the risk so the siblings prepare to depart on a journey they know will fundamentally change them Dashing new friends treacherous adversaries and profound choices lie ahead as the Pynes embark on the road to Paragonia In an age of emerging industry and entrenched social injustice the three Pynes commence a modern odyssey to recover their homeland

has been described as having a consciousness composed of equal parts historian ecologist philosopher critic poet and sociologist At this time in history when many people are trying to understand their true relationship with the natural environment this book offers a remarkable contribution breathtaking in the scope of its research and exhilarating to read Pyne takes the reader on a journey through time exploring the terrain of Europe and the uses and abuses of its lands as well as through migration and conquest many parts of the rest of the world Whether he is discussing the Mediterranean region Russia Scandinavia the British Isles central Europe or colonized islands whether he is considering the impact of agriculture forestry or Enlightenment thinking the author brings an unmatched insight to his subject *Vestal Fire* takes its title from Vesta Roman goddess of the hearth and keeper of the sacred fire on Mount Olympus But the book s title also suggests the strengths and limitations of Europe s peculiar conception of fire and through fire of its relationship to nature Between the untamed fire of the wilderness and the tended fire of the hearth lies a never ending dialectic in which human beings struggle to control natural forces and processes that in fact can sometimes be directed but never wholly dominated or contained
