Books for Schools and the Treatment of Minorities United States. Congress. House. Committee on Education and Labor. Ad Hoc Subcommittee on De Facto School Segregation,1966 Books for Schools and the Treatment of Minorities United States. Congress. House. Education and Labor,1966 Bridging the Achievement Gap John E. Chubb,Tom Loveless,2004-05-13 The achievement gap between white students and African American and Hispanic students has been debated by scholars and lamented by policymakers since it was first documented in 1966 The average black or Hispanic secondary school student currently achieves at about the same level as the average white student in the lowest quartile of white achievement Black and Hispanic students are much less likely than white students to graduate from high school acquire a college or advanced degree or earn a middle class living They are also much more likely than whites to suffer social problems that often accompany low income While educators have gained an understanding of the causes and effects of the education achievement gap they have been less successful in finding ways to eliminate it until now This book provides for the first time in one place evidence that the achievement gap can be bridged A variety of schools and school reforms are boosting the achievement of black and Hispanic students to levels nearing those of whites Bridging the Achievement Gap brings together the findings of renowned education scholars who show how various states school districts and individual schools have lifted the achievement levels of poor and minority students The most promising strategies include focusing on core academic skills reducing class size enrolling students in more challenging courses administering annual achievement assessment tests creating schools with a culture of competition and success and offering vouchers in big city school districts

While implementing new educational programs on a large scale is fraught with difficulties these successful reform efforts offer what could be the start of widespread effective solutions for bridging the achievement gap *Class Struggle and the New Deal* Rhonda F. Levine,1988 In this reassessment of New Deal policymaking Rhonda Levine argues that the major constraints upon and catalysts for FDR's policies were rooted in class conflict Countering neo Marxist and state centred theories which focus on administrative and bureaucratic structures she contends that too little attention has been paid to the effect of class struggle *The New American History* American Historical Association,1997 Originally released in 1990 The New American History edited for the American Historical Association by Eric Foner has become an indispensable volume for teachers and students In essays that chart the shifts in interpretation within their fields some of our most prominent American historians survey the key works and themes in the scholarship of the last three decades Along with substantially revised essays from the first edition this volume presents three entirely new ones on intellectual history the history of the West and the histories of the family and sexuality The second edition of The New American History reflects in Foner's words the continuing vitality and creativity of the study of the past how traditional fields are being expanded and redefined even as new ones are created Author note Eric Foner is DeWitt Clinton Professor of History at Columbia University He is the author of numerous books including *Reconstruction 1863-1877* which was awarded the Bancroft Prize **Research in Education**

,1973 *Resources in Education* ,1998 **Policy, Leadership, and Student Achievement** C. Kent McGuire,Vivian W. Ikpa,2008-09-01 This is the second book in the series examining student achievement The chapters in this book reflect the scholarly papers presented at the July 2006 Education Policy Leadership Summer Institute EPLSI by K-16 educators researchers community advocates and policymakers who work in urban communities The Institute serves as a place where individuals interested in scholarly discussions and research directly related to 1 how data can be utilized to inform policy 2 examining the urban school context from the perspectives of the policy school leaders students and other related internal and external actors and 3 identifying strategies for improving student academic achievement can gather During this week long Institute participants examined the structural problems and policy tensions affecting urban communities and student achievement The Institute's theme Meeting the Challenges of Urban Schools is reflected throughout this book Specifically this edition explores the interrelated aspects of policy practice and research and how they affect academic achievement The five sections in this book examine different challenges facing urban schools and their impact on student performance

Organizing the Curriculum ,2019-02-11 Contemporary American youth live in a culture that ignores or denigrates labor unions Mainstream media cover labor issues only sparingly and unions no longer play much of a role in popular culture texts films or images In our schools labor has been limited to a footnote in textbooks instead of being treated seriously as the most effective force for championing the rights of working people the vast majority of the citizenry Teachers have been convinced that to bring up class or to teach about the labor movement may be construed as taking sides while the all

pervasive presence of corporate America in our schools is rarely questioned So for all the talk of schools preparing young people for the work world we are failing to teach them even the basics of how that world is structured or how they can be empowered through collective action Organizing the Curriculum Perspectives on Teaching the US Labor Movement is the first book length treatment of this blind spot in contemporary curriculum and pedagogy Contributors to this collection unionists activists teachers teacher educators and academics interrogate the ways in which knowledge is constructed in school discourses conceptualize pedagogical strategies and curricula that open discussions around class analysis and political economy via studies of the labor movement and put forward an activist vision of education that truly engages young people beyond the classroom walls

The Labor of Words Christopher P. Wilson, 2010 In the three decades after 1885 a virtual explosion in the nation's print media newspaper tabloids inexpensive magazines and best selling books vaulted the American writer to unprecedented heights of cultural and political influence The Labor of Words traces the impact of this mass literary marketplace on Progressive era writers Using the works and careers of Jack London Upton Sinclair David Graham Phillips and Lincoln Steffens as case studies Christopher P Wilson measures the advantages and costs of the new professional literary role and captures the drama of this transformative epoch in American journalism and letters
