T. Shattuck,2021-06-01 Faith Hope and Sustainability explores the experiences of fifteen faith communities striving to care for the earth and live more sustainably A church in Maine partners with fishermen to create the first community supported fishery so they can make a living without overfishing A Jewish congregation in Illinois raises extra funds to construct a green synagogue that expresses their religious mission to heal the world Benedictine sisters in Wisconsin adopt caring for the earth as part of their mission and begin restoring one hundred acres of prairie reviving their community in the process

Presbyterians in Virginia dismayed by air pollution in Shenandoah National Park take courage from their conviction that God does not call us to do little things and advocate for improved national air pollution policies Stories such as these highlight the variety of environmental actions that people of faith are enacting through congregational venues Beyond simply narrating inspiring stories however this book compares these case studies to explore in detail the processes through which the communities took action In addition to examining why faith communities engage in earth care Cybelle T Shattuck explores

how they put intention into action and how the congregational context affects what they do She introduces an analytical framework focusing on four domains of activity champions faith leaders congregations and organizations to explicate the full range of factors that influence how initiatives develop and whether sustainability becomes embedded in these religious organizations Both the framework and the information on process presented in this book will be highly useful to scholars and to people of faith interested in implementing an earth care ethic through sustainability programs **Congressional Record** United States. With the death of associate justice Antonin Scalia the Supreme Court was plunged into crisis Refusing to hold hearings or confirm the nominee of a Democratic president almost a year away from a presidential election the Republican controlled Senate held the court hostage forcing it to do its work through nearly the entire term ending in June 2017 with just eight justices In *American Justice 2017* The Supreme Court in Crisis Kimberly Robinson examines the way individual justices and the institution as a whole reacted to this unprecedented politically fraught situation In public the justices put on brave faces waiting for the confirmation battle to play itself out while indicating in occasional statements that the court would muddle through just fine In private though things appear to have been more complicated Narrow decisions lackluster choice of cases and odd bedfellows teaming up on the same sides of opinions and dissents give us a hint of the strenuous effort the eight justices made to uphold the integrity of the institution in the face of hurricane force partisan gales *Code of Iowa*

The Importance of Being Little Erika Christakis, 2016-02-09 Christakis expertly weaves academic research personal experience and anecdotal evidence into her book a bracing and convincing case that early education has reached a point of crisis her book is a rare thing a serious work of research that also happens to be well written and personal engaging and important Washington Post What kids need from grown ups but aren't getting an impassioned plea for educators and parents to put down the worksheets and flash cards ditch the tired craft projects yes you Thanksgiving Handprint Turkey and exotic vocabulary lessons and double down on one simple word play NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four year old watching bulldozers at a construction site or chasing butterflies in flight the world is awash with promise Little children come into the world hardwired to learn in virtually any setting and about any matter Yet in today's preschool and kindergarten classrooms learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain These mismatched expectations wreak havoc on the family parents fear that if they choose the wrong program their child won't get into the right college But Yale early childhood expert Erika Christakis says our fears are wildly misplaced Our anxiety about preparing and safeguarding our children's future seems to have reached a fever pitch at a time when ironically science gives us more certainty than ever before that young children are exceptionally strong thinkers In her pathbreaking book Christakis explains what it's like to be a young child in America today in a world designed by and for adults where we have confused schooling with learning She offers real life solutions to real life

issues with nuance and direction that takes us far beyond the usual prescriptions for fewer tests more play She looks at children s use of language their artistic expressions the way their imaginations grow and how they build deep emotional bonds to stretch the boundaries of their small worlds Rather than clutter their worlds with more and more stuff sometimes the wisest course for us is to learn how to get out of their way Christakis s message is energizing and reassuring young children are inherently powerful and they and their parents will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood revealing a place that s rich with possibility
