

For steel pipes:

Pipe size ID (mm) (for EN253 pipe)	Typical velocity (m/s)
54.5	0.85
107.1	1.2
160.3	1.6
210.1	1.9
263.0	2.2
312.7	2.5

For polymer pipes:

Pipe size OD and pipe wall thickness (mm)	Typical velocity (m/s)
25 x 2.3	0.7
40 x 3.7	0.9
63 x 5.8	1.1
90 x 8.2	1.3
125 x 11.4	1.5
160 x 14.6	1.6

- ✓ 2.5.7 an alternative pipe sizing approach based on achieving approximately 250Pa/m pressure drop in each branch may be used, however higher pressure drops can be acceptable on non-critical side branches
- ✓ 2.5.8 if higher velocities than 3m/s are used a specific transient pressure check shall be carried out simulating the effect of valve closure and pump trips and the resultant pump discharge pressures from the energy centre
- ✓ 2.5.9 the thickness of insulation shall be selected when assessing pipe costs, and greater thickness may be required especially for areas of low heat density, for high cost heat sources and for new build schemes.

Note: Steel pipe to EN253 is typically available with three different insulation thicknesses (Series 1, 2 or 3). Some manufacturers of pre-insulated polymer pipes offer pipes with an increased thickness of insulation. See also Objective 3.5 for system heat loss requirements at design stage

Pressure Drop On Water Cibse Guide C4:

CIBSE Guide H: Building Control Systems Cibse,2007-06-01 Building Control Systems provides the building services engineer with a comprehensive understanding of modern control systems and relevant information technology This will ensure that the best form of control systems for the building is specified and that proper provision is made for its installation commissioning operation and maintenance Beginning with an overview of the benefits of the modern building control system the authors describe the different controls and their applications and include advice on their set up and tuning for stable operation There are chapters on the practical design of control systems how to work from the hardware components and their inclusion in networks through to control strategies in Heating Ventilation and Air Conditioning HVAC systems and whole buildings The relationship between Building Management Systems BMS and information technology systems is discussed and the building procurement process and the importance of considering control requirements at an early stage in the design process

Heating and Water Services Design in Buildings Keith Moss,Keith J Moss,2013-05-13 This book provides a thorough and practical coverage of design procedures with numerous examples and case studies The author has worked with open learning candidates of all ages as well with college students and university undergraduates

Air Conditioning Application and Design W.P. Jones,2012-11-12 Intended for advanced students of building services this practical book describes the design of air conditioning systems Readers are assumed to have a knowledge of the basic principles of air conditioning which are covered in the companion volume Air Conditioning Engineering This new edition takes account of the latest building codes and pays greater attention to energy conservation The section on systems characteristics is expanded and extensively revised to take account of developments in the technology of air conditioning since publication of the previous edition There are expanded sections on specialist applications such as systems for clean rooms in the semiconductor industry The author has wide experience both in lecturing on the subject and in the practical design and installation of air conditioning systems

Faber & Kell's Heating and Air-Conditioning of Buildings Doug Oughton,Steve Hodkinson,Richard Brailsford,2014-11-27 For over 70 years Faber Kell s has been the definitive reference text in its field It provides an understanding of the principles of heating and air conditioning of buildings in a concise manner illustrating practical information with simple easy to use diagrams now in full colour This new look 11th edition has been re organised for ease of use and includes fully updated chapters on sustainability and renewable energy sources as well as information on the new Building Regulations Parts F and L As well as extensive updates to regulations and codes it now includes an introduction that explains the role of the building services engineer in the construction process Its coverage of design calculations advice on using the latest technologies building management systems operation and maintenance makes this an essential reference for all building services professionals

A Whole-System Approach to High Performance Green Buildings David Strong,Victoria Burrows,2016-12-31 This authoritative new resource provides a comprehensive review of the

current approaches to the design and construction of sustainable buildings This hand on guide features global case studies with practical examples of both successful and unsuccessful designs The whole system approach to integrated design is clearly presented This book includes insight into designing for the future including design quality and future proofing intelligent buildings and whole life value Nature inspired sustainable designs that can be mimicked in the construction industry are presented Technical challenges such as energy efficiency design and computer modeling are explored along with various construction phase opportunities Combustion Engineering and Gas Utilisation British Gas,2014-05-01 Combustion Engineering Gas Utilisation is a practical guide to sound engineering practice for engineers from industry and commerce responsible for the selection installation designing and maintenance of efficient and safe gas fired heating equipment **Building Control Systems** ,2000 Beginning with an overview of the benefits of the modern building control system the authors go on to describe the different controls and their applications and include advice on their set up and tuning for stable operation **Heat and Mass Transfer in Building Services Design** Keith Moss,2002-09-11 Building design is increasingly geared towards low energy consumption Understanding the fundamentals of heat transfer and the behaviour of air and water movements is more important than ever before Heat and Mass Transfer in Building Services Design provides an essential underpinning knowledge for the technology subjects of space heating water services ventilation and air conditioning This new text provides core understanding of heat transfer and fluid flow from a building services perspective complements a range of courses in building services engineering underpins and extends the themes of the author s previous books Heating and Water Services Design in Buildings Energy Management and Operational Costs in Buildings Heat and Mass Transfer in Building Services Design combines theory with practical application for building services professional and students It will also be beneficial to technicians and undergraduate students on courses in construction and mechanical engineering Faber & Kell's Heating and Air-conditioning of Buildings D. R. Oughton,S. Hodgkinson,2008 For 70 years Faber Kell s has been the definitive reference text in its field The book provides understanding of the principles of heating and air conditioning of buildings in a concise manner Practical applicable information is illustrated with simple easy to use diagrams This 10th edition includes chapters on sustainability renewable energy sources as well as information on the updated Approved Documents Part F and L whilst still retaining the structure and character of the previous editions Building services professionals will find this a reliable everyday source of information The book is also an ideal purchase for newly qualified building services students beginning their career THE book for building services engineers for everyday reference on heating and air conditioning design Includes updates to take into account revised Part F and L sustainability and renewable energy sources Recommended purchase for newly qualified students in the building services sector *Faber & Kell's Heating & Air-conditioning of Buildings* Doug Oughton,Steve Hodgkinson,2008-02-29 First Published in 2008 Routledge is an imprint of Taylor Francis an informa company *Building Services Journal* ,2006 **Plumbing** Roy D.

Treloar,2011-12-07 The 4th edition of Plumbing continues to provide the definitive single volume text on plumbing heating and gas installation work ideal for students working towards their Diploma in plumbing or NVQ SVQ at levels 2 and 3 Highly illustrated and easy to read and understand it tackles plumbing topic by topic in double page spreads with text full colour illustrations and clear photographs enabling the reader to grasp the essentials quickly and easily This approach ensures it also provides a concise reference for the trained plumber Special features include concise text many clear full colour illustrations around 140 photographs topics focussed on the needs of NVQ SVQ levels 2 and 3 additional topics beyond levels 2 and 3 a self assessment section a problem solving section This new edition has been thoroughly updated to take account of changes to the Building Regulations including changes to the following approved documents Part F Ventilation Part G Sanitation hot water safety and water efficiency Part H Drainage and waste disposal Part L Conservation of fuel and power and Part P Electrical safety A significant new section on energy conservation sustainability has been added and additional related material introduced where relevant The extensive coverage with new full colour illustrations to enhance legibility and understanding and the emphasis on safety in the work place ensure this remains the definitive single volume for both student and trained plumbers
