**Critical Mathematics Education** Paul Ernest,Bharath Sriraman,Nuala Ernest,2016-01-01 Mathematics is traditionally seen as the most neutral of disciplines the furthest removed from the arguments and controversy of politics and social life However critical mathematics challenges these assumptions and actively attacks the idea that mathematics is pure objective

and value neutral It argues that history society and politics have shaped mathematics not only through its applications and uses but also through molding its concepts methods and even mathematical truth and proof the very means of establishing truth Critical mathematics education also attacks the neutrality of the teaching and learning of mathematics showing how these are value laden activities indissolubly linked to social and political life Instead it argues that the values of openness dialogicality criticality towards received opinion empowerment of the learner and social political engagement and citizenship are necessary dimensions of the teaching and learning of mathematics if it is to contribute towards democracy and social justice This book draws together critical theoretic contributions on mathematics and mathematics education from leading researchers in the field Recurring themes include The natures of mathematics and critical mathematics education issues of epistemology and ethics Ideology the hegemony of mathematics ethnomathematics and real life education Capitalism globalization politics social class habitus citizenship and equity The book demonstrates the links between these themes and the discipline of mathematics and its critical teaching and learning The outcome is a groundbreaking collection unified by a shared concern with critical perspectives of mathematics and education and of the ways they impact on practice English Mechanic and Mirror of Science ,1895 English Mechanic and Mirror of Science and Art ,1889 **Leonardo** ,1977

may alienate students just getting into the field or trying it out for the first time The illustrations the text is full of them coupled with the stories reinforce the fundamental information being conveyed John Paul Devlin Associate Professor of Theatre at Saint Michael s College What a great idea Thank heavens someone is doing this for students at that impressionable age That has been one of my mantras education of teachers and students on the use of scenic materials The teachers don t have enough time in college to learn and do everything they have to teach Most get thrown into the theatre area by default and struggle with designing building painting the scenery Jenny Knott Rosco Stagecraft Fundamentals is beautifully illustrated throughout and the pofusion of color on every page gives this textbook the appearance of a coffee table book The writing is clear and personal which should be very appealing to students Rita Carver covers all aspects of theatre production from scenery to lighting to an actor s makeup Her close ties to the New York theatre scene gives this book a special insight into the professional world one that goes well beyond what is found in most college textbooks John Holloway Professor in the Theatre Department at the University of Kentucky and President of the International Association of Theatrical stage Employees IATSE Local 346 I can t thank you enough for Stagecraft Fundamentals I have been teaching stagecraft since 1976 and you have saved me from the nightmare of writing a text to suit my class needs After two semesters with your text I have found that I had more time to develop the skills necessary within the classroom than before The humor that you have infused in the book has enticed my students to read on That alone makes this text invaluable Meta Lasch Assistant Professor West Liberty University
