Hattrup, 2020-11-25 This volume emerges from a partnership between the American Federation of Teachers and the Learning Research and Development Center at the University of Pittsburgh The partnership brought together researchers and expert teachers for intensive dialogue sessions focusing on what each community knows about effective mathematical learning and instruction The chapters deal with the research on and conceptual analysis of specific arithmetic topics addition subtraction multiplication division decimals and fractions or with overarching themes that pervade the early curriculum and constitute the links with the more advanced topics of mathematics intuition number sense and estimation Serving as a link between the communities of cognitive researchers and mathematics educators the book capitalizes on the recent research successes of cognitive science and reviews the literature of the math education community as well Mathematics Classrooms: Students' Activities and Teachers' Practices Fabrice Vandebrouck, 2013-09-03 With cooperation of Aline Robert Janine Rogalski Maha Abboud Blanchard Claire Cazes Monique Chappet Paris Aur lie Chesnais Christophe Hache Julie Horoks Eric Roditi Nathalie Sayac This book presents unique insights into a significant area of French research relating the learning and teaching of mathematics in school classrooms and their development Having previously had only glimpses of this work I have found the book fascinating in its breadth of theory its links between epistemological didactic and cognitive perspectives and its comprehensive treatment of student learning of mathematics classroom activity the work of teachers and prospective teacher development Taking theoretical perspectives as their starting points the authors of this volume present a rich array of theoretically embedded studies of mathematics teaching and learning in school classrooms Throughout this book the reader is made aware of many unanswered questions and challenged to consider associated theoretical and methodological issues For English speaking communities who have lacked opportunity to access the French literature the book opens up a wealth of new ways of thinking about and addressing unresolved issues in mathematics learning teaching and teacher education I recommend it wholeheartedly Extract from Barbara Jaworski's preface **Resources in Education**, 1995 **The**
