Tool, *Challenging the Internationalisation of Education* Lucy Bailey, 2023-07-07 This book presents a searing critique of the global take on education questioning why the idea that education should be international has come to dominate the field and positing that the discourse of internationalisation has altered the way we conceptualise education Using diverse examples from the Middle East the UK and South East Asia the book gathers insights from international schooling refugee education and the internationalisation of higher education to argue that the global gaze renders other ways of looking at education as invisible It suggests that an oversaturation of international comparison amongst individuals
