Subcommittee on Civil Defense, 1955 Infantry , 1984 *Civil Defense Program* United States. Congress. Senate. Committee on Armed Services, 1955 The Making of DSM-III® Hannah Decker PhD, 2013-03-29 In 1973 the American Psychiatric Association decided to publish a revised edition of their Diagnostic and Statistical Manual DSM There was great hope that a new manual would display psychiatry as a scientific field and aid in combating the attacks of an aggressive anti psychiatry movement that had persisted for more than a decade The Making of DSM III is a book about the manual that resulted in 1980 DSM III a far reaching revisionist work that created a revolution in American psychiatry Its development precipitated a historic clash between the DSM III Task Force a group of descriptive empirically oriented psychiatrists and psychologists and the psychoanalysts the Task Force was determined to dethrone from their dominance in American psychiatry DSM III also inaugurated an era in which it and the diagnostic manuals that followed played enormous roles in the daily lives of persons and organizations all over the world for the DSMs have been translated into many languages The radical revision process was led by the psychiatrist Robert L Spitzer a many talented man of great determination energy and tactical skills arguably the most influential psychiatrist of the second half of the 20th Century Spitzer created as major a change in descriptive psychiatry and classification as had the renowned German psychiatrist Emil Kraepelin almost a century earlier Kraepelin had been the epochal delineator of dementia praecox from manic depressive illness the forerunners of modern schizophrenia and bipolar disorder In her book Hannah Decker portrays the many internal and external battles that roiled the creation of DSM III and analyzes both its positive achievements and significant drawbacks She also astutely explores the deleterious effects of the violent swings in scientific orientation that have dominated psychiatry over the past 200 years and are still alive today Decker has written a revealing and exciting book that is based on archival sources never before used as well as extensive interviews with the psychiatrists

and psychologists who have brought into being the psychiatry we know today      *Extinction in Our Times* James P. Collins, Martha L. Crump, Thomas E. Lovejoy III, 2009-07-07 For over 350 million years thousands of species of amphibians have lived on earth but since the 1990s they have been disappearing at an alarming rate in many cases quite suddenly and mysteriously What is causing these extinctions What role do human actions play in them What do they tell us about the overall state of biodiversity on the planet In *Extinction in Our Times* James Collins and Martha Crump explore these pressing questions and many others as they document the first modern extinction event across an entire vertebrate class using global examples that range from the Sierra Nevada of California to the rainforests of Costa Rica and the Mediterranean coast of North Africa Joining scientific rigor and vivid storytelling this book is the first to use amphibian decline as a lens through which to see more clearly the larger story of climate change conservation of biodiversity and a host of profoundly important ecological evolutionary ethical philosophical and sociological issues      *Psychosis, Psychiatry and Psychospiritual Considerations* Brian Spittles, 2022-11-29 A phenomenological and spiritual investigation of anomalous mental experiences From a psychiatric perspective psychosis is generally viewed as a psychopathological and often incomprehensible mental disorder of biological cause In his book Brian Spittles argues that this represents a rather limited view and that a psychospiritual investigation of psychosis may enable a better understanding of its nature and determinants His aim is not to negate the discipline of psychiatry but to demonstrate the viability and efficacy of incorporating psychospiritual considerations into psychosis research Within these pages Spittles challenges several core psychiatric beliefs and calls for the discipline to extend its investigative parameters beyond the limited epistemological bounds of materialism The book uses an open ended heuristic approach that enables the systematic examination and critical appraisal of views on psychosis across the materialist to metaphysical spectrum This is structured in four Focal Settings that sequentially examine the construal of psychosis within different paradigms of psychospiritual understanding which provide a historical overview of evolving understandings of psychosis within the tradition of psychiatry in which psychospiritual matters are generally not considered

**The Mental Health of Children and Adolescents** Helmut Remschmidt,Barry Nurcombe,Myron Lowell Belfer,Norman Sartorius,Ahmed Okasha,2007-04-04 Around the world a vast number of children and adolescents suffer from mental and neurological disorders and only a small proportion of them receive adequate care This is so in both developing and developed countries The need to raise awareness about this problem and provide specific advice regarding their prevention and treatment was identified as a priority for the World Psychiatric Association by Professor Ahmed Okasha during his Presidency of the Association and resulted in the creation of his Presidential Programme on Child Mental Health This book presents some of the fruits of this programme and constitutes a global call to action for mental health workers and policy makers

**The Mental Health of Children and Adolescents** An area of global neglect brings together information on the burden of mental disorders in childhood and adolescence with methods of raising public awareness of these problems The book also describes therapeutic and preventive interventions that could diminish them It then presents the results of field studies in Brazil Egypt and Russia documenting the effectiveness of interventions to prevent school dropout in those three very different countries With its emphasis on practical guidance for the development of interventions to prevent or treat child and adolescent mental health

**The Mental Health of Children and Adolescents** An area of global neglect provides much needed information of direct interest to health professionals and the many others involved in the provision of health care to children and adolescents in both the developing and the developed countries
