Sustainable Public Procurement Under EU Law Beate Sjøfjell, Anja Wiesbrock, 2015-12-03 This book evaluates the 2014 EU public procurement law reform from a sustainability perspective **Sustainable Public Procurement** Anastasia O'Rourke, 2013 With governments responsible for significant portions of national spending the promise of including sustainability considerations into that spending can enable policy makers to lead by example with sustainable public procurement SPP The report examines the state of sustainable public procurement policies and practices being undertaken by national governments worldwide in the last five years The research included a comprehensive literature and desktop review 19 interviews six country case studies and a survey of 273 SPP experts worldwide The objective was to create a baseline analysis that examines the evolving field of SPP and the drivers barriers needs and opportunities in SPP

Sustainability in Public Procurement, Corporate Law and Higher Education Lela Melon, 2023-12-12 Contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices This book provides a new viewpoint and approach of simultaneously regulating seemingly non connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes It addresses diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement private market transaction and in educating future business leaders and legal experts by incorporating sustainable concerns as the underlying guiding principles of their conduct It translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields The underlying assumption is that a simultaneous action in the three respective fields of public procurement corporate law and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices The book furthers the idea of policy coherence by building upon the findings in the field of public procurement corporate law and practice and higher education curricula By identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the EU level the book calls for further changes in the respective fields as well as for considering the spillover effects of these policies on other fields *OECD Public Governance Reviews Harnessing Public Procurement for the Green Transition Good Practices in OECD Countries* OECD, 2024-06-26 This report presents the results of the 2022 OECD Green Public Procurement GPP Survey to which 38 countries OECD Member and accession candidate countries responded The aim of the survey was to better

understand how public procurement a significant economic lever is being used to generate environmental benefits The report is organized around four areas green public procurement policy and strategic framework public private interactions on green public procurement the monitoring and the evaluation of green public procurement and building capacity and support for green public procurement Developments in GPP since the survey was completed in 2022 are included in the country specific factsheets annexed to the report

Mandatory Sustainability Requirements in EU Public Procurement Law Willem Janssen,Roberto Caranta,2023-10-05 This book provides the first comprehensive appraisal of the paradigm shift towards mandatory sustainability requirements in EU public procurement law Traditionally EU public procurement law focused on how to buy dictating procedural rules so that public buyers in the Member States did not discriminate against suppliers and service providers from other Member States Mandatory green and social requirements mean that with a view to achieving sustainable development goals and mitigating climate change the EU will limit this discretionary power for public buyers pushing them to acquire more sustainable goods and services Based on legal analysis informed by economic perspectives the book aims to contribute to an understanding and critical discussion of the EU legislator s move towards regulating what to buy The book discusses the role of the Public Procurement Directives in relation to this paradigm shift as well as various other sectoral legislative instruments that have been revamped or newly introduced in light of the European Green Deal The paradigm shift is analysed from different perspectives including subsidiarity alternative regulation economics and public purchasing The book includes novel sectoral studies on transport food clothing and construction discussing how change is taking place and what its major challenges are for the future Chapters on Italy the Netherlands Spain and more offer case studies of Member States that have already introduced mandatory requirements and highlight lessons learnt This is an essential book for professionals working with public procurement law in academia and practice and to those engaged in achieving public policy objectives in light of climate change and social injustice

Cyprus Energy Policy, Laws and Regulation Handbook Volume 1 Strategic Information and Regulations IBP USA, **Urban Freight, land use planning and public administration strategies** Edoardo Marcucci, Valerio Gatta, Laetitia Dablanc, 2019-11-25. Cities are the engines of an innovation-based economy where research and new ideas are the core input of production. Urbanisation is becoming synonymous of economic growth. People flock into cities both in the developed and developing world since here is where wealth is where high quality services are available and life standards are comparatively higher with respect to other places. However, one has to acknowledge that growth also produces undesired negative effects. In fact, cities are net importers. They need to acquire consumption intermediate goods, export production, and get rid of waste. In other words, the existence of a city relies on a transportation system providing the necessary services for its functioning. The typical urban transportation system heavily depends on passenger and freight movements by road. While

this dependency is in some cases less relevant for passenger transport most of freight moved in out within and through a city relies on motorized road transportation Trucks and vans are responsible for congestion polluting emissions accidents noise visual intrusion and stench All these negative effects are concentrated where many citizens live and consequently produce relevant economic e g time lost environmental e g air quality and social e g segregation impacts Cities to be attractive sustainable and thriving need an efficient freight transportation system Fast changing consumption patterns with the rise of e commerce and home deliveries also point out to another dimension of cities their need to adapt quickly to economic trends
