JUNE 2002 Causey Enterprises, LLC, *Nonimaging Fresnel Lenses* Ralf Leutz,Akio Suzuki,2012-12-06 Nonimaging Fresnel
Lenses Design and Performance of Solar Concentrators what are we talking about It is easy to forget that you dear reader
may not be one of those who work in exactly the same field as we do nonimaging optics for the concentration of sunlight You
may be a researcher in some optical science interested in the core subject of this book the world's first practical design of a
nonimaging Fresnel lens concentrator You may not be too excited about the collection of solar energy but you would want a
full description of the optical performance of the lens Which you will get mostly in terms of nonimaging optics complete with
test results and set against the competition of imaging Fresnel lenses and mirror based imaging and nonimaging
concentrators If you are a solar energy professional you are likely to be interested in reading why nonimaging optics and
solar energy collection go together so well They do so because the concentration of solar energy does not demand imaging
qualities but instead requires flexible designs of highly uniform flux concentrators coping with solar disk size solar spectrum
and tracking errors Nonimaging optics has been developed to perfection since its discovery in 1965 in dealing with solar
power conversion Much of this experience is useful in nonimaging optical design in other fields where the markets already
are more rewarding than in solar power generation such as optoelectronics **WALNECK'S CLASSIC CYCLE TRADER**,
