**Overlapping Generations** Stephen E. Spear, Warren Young, 2023-09-04 The 800 pound gorilla in the room of macroeconomics is the question of why the overlapping generations model didn't become the central workhorse model for macroeconomics as opposed to the neoclassical growth model The authors here explore the co evolution of the two models

Flood, 2003-07-11 This paper examines sources of economic growth in East Asia The conventional growth accounting approach to estimating the sources of economic growth requires unrealistically strong assumptions about either competitiveness of factor markets or the form of the underlying aggregate production function The paper outlines a new approach utilizing nonparametric derivative estimation techniques that does not require imposing these restrictive assumptions The results for East Asian countries show that output elasticities of capital and labor tend to be different from the income shares of these factors The paper also explores the compensating potential of private intergenerational transfers OECD Working Papers, 1998 *The Oxford Handbook of Work and Aging* Jerry W. Hedge, Walter C. Borman, 2012-04-19 Global aging technological advances and financial pressures on health and pension systems are sure to influence future patterns of work and retirement This handbook offers an international multi disciplinary perspective examining the aging workforce from an individual worker organization and societal perspective **Pro-poor Growth and Liberalization in Developing Economies** Sanjaya Acharya, 2013-03-01 By looking at the link between trade liberalization and pro poor growth in Nepal this book explores how a developing and transition economy can attain higher and pro poor growth along with the ongoing trend of globalization The author develops a social accounting database for Nepal and applies it to quantify computable general equilibrium CGE model to investigate the trade offs between growth and distribution that are associated with opening up the economy and deregulating it The book presents a number of pragmatic scenarios that bring about the desired pro poor growth effects in order to demonstrate possible outcomes for policy making The research findings apply to other economies with similar macroeconomic structure to Nepal those small economies with a dominant traditional and stagnant agriculture fragile

industrial base weak and volatile external sector and almost half of the population living below the poverty line This book will be of considerable interest to students and scholars in the areas of development economics political economy of policy reforms and trade and poverty with special emphasis on South Asia      **Intergenerational Implications of Fiscal**

**Consolidation in Japan** Kiichi Tokuoka,2012-08-01 In Japan intergenerational inequality in lifetime resources is substantial with a heavier fiscal burden on the young than the old Moreover given the need for fiscal consolidation the inequality is even worse than existing policy would suggest However this does not mean that fiscal consolidation would make the young worse off Lack of fiscal consolidation would eventually increase interest rates which would reduce output and hit young generations harder Simulations using an overlapping generations model indicate that from the perspective of intergenerational fairness it would be desirable to include both social security spending reforms and revenue measures in a fiscal consolidation package The simulations also show that delaying fiscal consolidation could be costly and worsen intergenerational resource inequality

*Australia's Fiscal Framework: Revisiting Options for a Fiscal Anchor* Allan Dizioli,Mr.Philippe D Karam,Mr.Dirk V Muir,Siegfried Steinlein,2017-12-22 This paper revisits options for fiscal anchors in Australia against the backdrop of a medium term budget balance anchor that has led to larger than expected upward drift in the net debt to GDP ratio since the end of the mining investment boom The IMF s G20MOD model is used to compare the budget balance anchor with a long term debt anchor Using model simulations evaluated against objective macro stabilization debt control criteria under three likely scenarios for the Australian economy the latter is found to perform at least as well as the former The paper also considers the operationalization of a long term debt anchor utilizing a combination of fiscal rules which includes expenditure restrictions and a flexible time horizon for convergence aiming at encouraging countercyclical fiscal policy and minimizing the cost in terms of real GDP foregone in the medium term under fiscal consolidation      **Australia** International Monetary Fund. Asia and Pacific Dept,2017-02-09 This Selected Issues paper examines the adjustment of Australian labor markets to the recent adverse shocks Australia s labor markets were not severely impacted by the global financial crisis and are adjusting smoothly to the sizeable commodity prices bust and mining investment downturn However some labor market indicators suggest persistent weaknesses There does not appear to be a significant increase in structural employment in the wake of the commodity prices bust and mining investment decline Increased flexibility in average hours per worker has likely moderated employment reduction in downturns and prevented a larger increase in unemployment in the wake of the mining investment downturn At the same time elevated underemployment signals additional slack and is likely weighing down wage growth      Golden Aging Maurizio Bussolo,Johannes Koettl,Emily Sinnott,2015-06-23 Societies across Europe and Central Asia are aging but people are not necessarily living longer This demographic trend caused by a decrease in fertility rather than improved longevity presents both challenges and opportunities for governments the private sector and individuals alike Some of the challenges are well known Output per capita becomes smaller if it is shared with an increasingly larger group of

dependent older people At a certain point there may not be sufficient resources to maintain the living standards of this older group especially if rising expenditures on health care long term care and pensions must be financed through the contributions and taxes paid by ever smaller younger age groups Working adults also contribute the most to the pool of savings As the size of this group shrinks savings will decline But these challenges can be transformed into opportunities Consider these examples As longevity increases workers tend to stay in the workforce longer and with the right incentives they will increase their savings Many current workers and perhaps even more in the future will thus not necessarily become dependent once they turn 65 And with slower population growth and smaller young age groups societies will have an opportunity to improve the quality of education and maintain productivity Firms in some countries are already adapting by capitalizing on skills that appreciate with age Cardiovascular diseases account for more than half the difference in life expectancy above age 50 between the region and Western Europe for men and 75 percent of the corresponding difference for women Healthier behavior and health systems focused on preventive care could with no cost increase dramatically reduce this risk These opportunities are not to be missed As populations age public discourse ranges from concerns about economic decline and fiscal sustainability of pensions and health systems to optimism about opportunities for healthier and more productive aging The main contribution of Golden Aging is perhaps to show that demography and its consequences are not fixed Much will depend on how people firms and societies adapt and how policy makers and institutions facilitate their behavioral adjustments The future for Europe and Central Asia does not have to be gray it can be a golden era of healthy active and prosperous aging

Assessing the Macroeconomic Impact of Structural Reforms The Case of Italy Ms.Lusine Lusinyan,Mr.Dirk Muir,2013-01-24 Wide ranging structural reforms are underway in Italy aimed at addressing key bottlenecks in the product and labor markets Our analysis based on the IMF s Global Integrated Monetary and Fiscal model GIMF attempts to quantify the potential gains to the economy from a comprehensive package of structural reforms We find that these gains can be sizeable While in most cases the reforms go in the right direction their impact would depend on effective and timely implementation In some areas especially in the labor market reforms would benefit from further strengthening The priorities should be to strengthen competition in the non tradable sector and make the labor market more efficient and inclusive supported by growth friendly fiscal reforms

**IMF Staff papers** International Monetary Fund. Research Dept.,1995-01-01 This paper develops an endogenous growth model of the influence of public investment public transfers and distortionary taxation on the rate of economic growth The growth enhancing effects of investment in public capital and transfer payments are modeled as is the growth inhibiting influence of the levying of distortionary taxes that are used to fund such expenditure The theoretical implications of the model are then tested with data from 23 developed countries between 1971 and 1988 and time series cross sectional results are obtained that support the proposed influence of the public finance variables on economic growth

**Value and Capital: Fifty Years Later** Stefano Zamagnid,2016-07-27

**Advanced Introduction to Taxation** George R. Zodrow,2025-01-09 George Zodrow offers a fresh look at taxation from a public economics perspective focusing on how taxes affect economic behaviour and impact the decisions of both households and businesses

**Public Finance** Richard W. Tresch,2014-11-10 Public Finance remains the premier textbook on the normative theory of government policy with the third edition propelling into the twenty first century its examination of what government ought to be doing instead of what it is doing The welfare aspects of public economics receive extensively renewed examination in this third edition With four new chapters and other significant revisions it presents detailed and comprehensive coverage of theoretical literature empirical work environmental issues social insurance behavioral economics and international tax issues With increased emphasis on the European Union it is rigid enough for use by PhDs while being accessible to students less well trained in math Moves skillfully from explaining normative theory to applying it in mathematically compact and precise terms Adds new chapters on social insurance medical care social security pensions behavioral public economics and international public finance Includes new pedagogical supplements including end of chapter questions and answers Emphasizes European examples

**Optimal Redistributive Taxation** Matti Tuomala,2016 Tax systems raise large amounts of revenue for funding public sector s activities and tax transfer policy together with public provision of education health care and social services play a crucial role in treating the symptoms and the causes of poverty The normative analysis is crucial for tax transfer design because it makes it possible to assess separately how changes in the redistributive criterion of the government and changes in the size of the behavioural responses to taxes and transfers affect the optimal tax transfer system Optimal tax theory provides a way of thinking rigorously about these trade offs Written primarily for graduate students and researchers this volume is intended as a textbook and research monograph connecting optimal tax theory to tax policy It comments on some policy recommendations of the Mirrlees Review and builds on the authors work on public economics optimal tax theory behavioural public economics and income inequality The book explains

in depth the Mirrlees model and presents various extensions of it The first set of extensions considers changing the preferences for consumption and work behavioural economic modifications such as positional externalities prospect theory paternalism myopic behaviour and habit formation but also heterogeneous work preferences besides differences in earnings ability The second set of modifications concerns the objective of the government The book explains the differences in optimal redistributive tax systems when governments instead of maximising social welfare minimise poverty or maximise social welfare based on rank order or charitable conservatism social welfare functions The third set of extensions considers extending the Mirrlees income tax framework to allow for differential commodity taxes capital income taxation public goods provision public provision of private goods and taxation commodities that generate externalities The fourth set of extensions considers incorporating a number of important real word extensions such as tagging of tax schedules to certain groups of tax payers In all extensions the book illustrates the main mechanisms using advanced numerical simulations **CBO's Analysis**
