pro Christina Chung of fluent garden introduces a modern approach to home food gardening that follows nature's lead by growing plants in mixed communities instead of in agriculture-centric monocultures. By intentionally including edible plants from 8 different layers: trees, sub-canopy trees, shrubs, vines, perennials, annuals, ground covers, and edible roots in your home garden, you'll be building a mini food forest that will produce food for years to come and require less work and fewer resources. With the insight found in *The Layered Edible Garden*, you'll learn how to transform your home's landscape into an edible plant community. Meet dozens of plants in each of the 8 layers. Discover the many perks of growing perennial food crops that return to the garden year after year. Find design and planting advice to make your layered edible garden as attractive as it is productive. Be introduced to intensive planting strategies to organize plant layers in a functional and beautiful way. Acquire info on how to establish new planting areas and how to utilize the existing garden features already present. Whether you have sun or shade, a large growing space or a small one, planting many layers of food plants together results in a diverse, low-maintenance edible garden filled with plants that help support each other. The future of growing food is multi-layered.
