Oral History for the Qualitative Researcher Valerie J. Janesick, 2010-03-18 Oral history is a particularly useful way to capture ordinary people's lived experiences. This innovative book introduces the full array of oral history research methods and invites students and qualitative researchers to try them out in their own work. Using choreography as an organizing metaphor, the author presents creative strategies for collecting, representing, analyzing, and interpreting oral history data. Instructive exercises and activities help readers develop specific skills such as nonparticipant observation, interviewing, and writing, with a special section on creating found data poems from interview transcripts. Also covered are uses of journals, court transcripts, and other documents. Internet resources such as social networking sites and photography and video. Emphasizing a social justice perspective, the book includes excerpts of oral histories from 9/11 and Hurricane Katrina among other detailed case examples.

Lasting Female Educational Leadership Laura Hills, 2012-08-14 Our colleges and universities are being led in large part by baby boomers who are now in later midlife. Huge numbers of those middle-aged leaders will retire within the next 10 years. While we know that being in later midlife and impending retirement must influence a person in a leadership position at an institution of higher learning, we don't really understand how. This book is based upon an empirical study that linked higher education leadership to one aspect of midlife known as generativity. This psychosocial phenomenon was described by Erik Erikson as a desire that peaks in midlife to leave something for future generations before one dies. Generativity typically manifests itself in the legacy one intends to leave. The author of this book has completed a multiple case study of women who are in later midlife and who hold high-level leadership positions at an institution of higher learning. In this work, she shares more than has ever been known about the nature, antecedents, and support of generativity in the leadership of female higher education leaders in midlife.
