Managing supply chains of pre-production drugs for clinical trials is therefore an essential component of drug development. **Supply Chain Planning for Clinical Trials** offers a practical introduction to this process for researchers and industry professionals. Beginning with the basics of clinical trial supply chain management, it proceeds step by step through all aspects of demand and supply planning for clinical trials. The result is a thorough overview that also offers practical examples of how to plan supply for clinical trials. **Supply Chain Planning for Clinical Trials** readers will also find Tools for minimizing risk and expense by optimizing the relationship between supply and demand. Detailed discussion of topics including quality and regulatory considerations and the business processes that support clinical trial supply chain management. Spreadsheet-based models to illustrate key concepts adaptable to the reader's specific scenarios. **Supply Chain Planning for Clinical Trials** is ideal for pharmaceutical industry professionals involved in clinical trial supply planning as well as academics and researchers interested in the pharmaceutical industry and its logistics. **E-Logistics and E-Supply Chain Management: Applications for Evolving Business** Graham, Deryn, Manikas, Ioannis, Folinas, Dimitris K., 2013-04-30 This book explores the creation of integrated supply chains, the developments of virtual business, and the processes of re-engineering for business development.

Business Process Management Wil M.P. van der Aalst, Boualem Benatallah, Fabio Casati, Francisco Curbera, 2005-08-18. This volume contains the proceedings of the 3rd International Conference on Business Process Management BPM 2005 organized by LORIA in Nancy France September 5-8 2005. This year BPM included several innovations with respect to previous editions most notably the addition of an industrial program and of co-located workshops. This was the logical result of the significant and still growing industrial interest in the area and of the broadening of the research communities working on BPM topics. The interest in business process management and in the BPM conference was demonstrated by the quantity and quality of the paper submissions. We received over 176 contributions from 31 countries accepting 25 of them as full papers: 20 research papers and 5 industrial papers while 17 contributions were accepted as short papers. In addition to the regular industry and short presentations invited lectures were given by Frank Leymann and Gustavo Alonso. This combination of research papers, industrial papers, keynotes and workshops all of very high quality has shown that BPM has become a mature conference and the main venue for researchers and practitioners in this area. We would like to thank the members of the Program Committee and the reviewers for their efforts in selecting the papers. They helped us compile an excellent scientific program. For the difficult task of selecting the 25 best papers (14% acceptance rate) and 17 short papers each paper was reviewed by at least three reviewers except some out of scope papers.
