Ophiolites In Earth History:

Ophiolites in Earth History Yildirim Dilek, Paul T. Robinson, 2003 The 32 papers in this volume examine the mode and nature of igneous metamorphic tectonic sedimentological and biological processes associated with the evolution of oceanic crust in different tectonic settings in Earth history as revealed in various ophiolites and ophiolite belts around the world and the geodynamic significance of these ophiolites in the evolution of different orogenic systems Divided into six thematic sections the book presents a wealth of new data and syntheses from mainly Phanerozoic ophiolites around the world
