Oppositions and Ideology in News Discourse Matt Davies, 2013-05-23 Investigates how binary oppositions are constructed discursively and how they are used in news reports in the British press      **The Stylistics of Poetry** Peter

Verdonk, 2013-08-15 Written over the last thirty years this collection of Professor Peter Verdonk's most important work on the stylistics of poetry clearly shows that the stylistics of poetic discourse is a diverse and valuable interdisciplinary. Discussing the poetry of Auden, Heaney and Larkin amongst many others Verdonk covers everything from intrinsic textual meaning and external context in its widest sense to the reader's cognitive and emotive response to poems. The book will appeal to all students on stylistics and literary linguistics courses especially those focussing on poetry and poetic language      *Text World*

*Theory and Keats' Poetry* Marcello Giovanelli, 2013-10-17 Uses and further develops text world theory via stylistic exploration of Keats's poetry      **Pedagogical Stylistics** Michael Burke, Szilvia Csabi, Lara Week, Judit Zerkowitz, 2012-03-29 An

exploration of cutting edge international trends in the pedagogy of stylistics illustrating current theory and teaching methods with both empirical data and practical examples      **Chick Lit** Rocío Montoro, 2012-04-19 The first book length study of the

genre of chick lit informed by an advanced stylistic approach covering tradition and cognitive angles      **The Language of**

**Inequality in the News** Michael Toolan, 2018-12-06 Explores how UK wealth inequality is discussed in newspapers with a particular focus on changes over the past forty five years      *Making Sense of Narrative Text* Michael Toolan, 2016-06-03

This book takes the following question as its starting point: What are some of the crucial things the reader must do in order to make sense of a literary narrative? The book is a study of the texture of narrative fiction using stylistics corpus linguistic principles especially Hoey's work on lexical patterning narratological ideas and cognitive stylistic work by Werth, Emmott and others. Michael Toolan explores the textual grammatical nature of fictional narratives critically re-examining foundational ideas about the role of lexical patterning in narrative texts and also engages the cognitive or psychological processes at play in literary reading. The study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise concerning the nature of narrative comprehension and the reader's experience in the course of reading narratives and particularly concerning the role of language in that comprehension and experience. The ideas of situation, repetition and picturing are all central to the book's argument about how readers process story and Toolan also considers the ethical and emotional involvement of the reader developing hypotheses about the text linguistic characteristics of the most ethically and emotionally involving portions of the stories examined. This book makes an important contribution to the study of narrative text and is in dialogue with recent work in corpus stylistics, cognitive stylistics and literary text and texture      **Practices of**

**Comparing** Angelika Epple, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive, organize and change the world. Supposedly innocent practices of comparing play a decisive role in forming categories, boundaries and hierarchies but they can also give an impetus to question and change such structures. Like almost no other

human practice comparing pervades all social political economic and cultural spheres This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration Its contributions combine case studies with overarching systematic considerations They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research

**Style in the Renaissance** Patricia Canning, 2012-05-24 In a book which brings together language text and context Patricia Canning synthesizes models of contemporary stylistics with both critical and literary historical theory In doing so the author maintains a specific and sustained stylistic focus on the religious political and ideological issues that animated and defined Reformation England Each chapter interrogates the dichotomous concept of word and image by considering the ways in which writers of this period deal with these contentious subjects in their dramatic and poetic works Representation Canning argues is not just as a matter of semiotics but of ideology Whereas stylistics enjoys extensive application in the analysis of contemporary texts it has until now been markedly under used in the exploration of the historical literary genre Addressing this shortcoming squarely and robustly Canning s book is a showcase for the stylistic method Among its many insights this book shows how stylistics can enrich our understanding and critical interpretation of a particular literary genre in its ideological and historical context

World Building Joanna Gavins, Ernestine Lahey, 2018-02-22 World Building represents the state of the discipline in worlds based approaches to discourse collected together for the first time Over the last 40 years the text as world metaphor has become one of the most prevalent and productive means of describing the experiencing of producing and receiving discourse This has been the case in a range of disciplines including stylistics cognitive poetics narratology discourse analysis and literary theory The metaphor has enabled analysts to formulate a variety of frameworks for describing and examining the textual and conceptual mechanics involved in human communication articulating these variously through such concepts as possible worlds text worlds and storyworlds Each of these key approaches shares an understanding of discourse as a logically grounded cognitively and pragmatically complex phenomenon Discourse in this sense is capable of producing highly immersive and emotionally affecting conceptual spaces in the minds of discourse participants The chapters examine how best to document and analyze this and this is an essential collection for stylisticians linguists and narrative theorists

Sylvia Plath and the Language of Affective States Zsafia Demjen, 2017-02-23 Focusing on the first journal in The Unabridged Journals of Sylvia Plath this book writes a convincing case for the value of corpus based stylistics and narrative psychology in the analysis of representations of the experience of affective states Situated at the intersection between language study psychology and healthcare this study of the personal writing of a poet and novelist showcases a cutting edge combination of quantitative and qualitative approaches including metaphor analysis corpus methods and second person narration Techniques that systematically account for representations of experiences of affective states such as those in this book are rare and crucial in improving understanding of these experiences The findings and methods of this book therefore

potentially have bearing on the study diagnosis and treatment of depression and other mental illnesses Zs fia Demj n follows the cognitive turn in both literary studies and linguistics here emerging with a greater understanding of Plath her diarized output and her experience of her inner world

Crime Fiction Migration Christiana Gregoriou,2019-01-24 Explores how crime narratives carry meaning when they travel from one place to another crossing the boundaries of the language culture and medium in which they were created

Stylistic Manipulation of the Reader in Contemporary Fiction Sandrine Sorlin,2019-12-12 This book focuses on how readers can be manipulated during their experience of reading fictional texts and how they are incited to perceive process and interpret certain textual patterns Offering fine grained stylistic analysis of diverse genres including crime fiction short stories poetry and novels the book deciphers various linguistic pragmatic and multimodal techniques These are skilfully used by authors to achieve specific effects through a subtle manipulation of deixis metalepsis dialogue metaphors endings inferences or rhetorical narratorial and typographical control Exploring contemporary texts such as *The French Lieutenant's Woman* *The Remains of the Day* and *We Need to Talk About Kevin* chapters delve into how readers are pragmatically positioned or cognitively mis directed as the author guides their attention and influences their judgment They also show how readers responses can conversely bring about a certain form of manipulation as readers challenge the positions the texts invite them to occupy

*Telecinematic Stylistics* Christian Hoffmann,Monika Kirner-Ludwig,2020-05-14 Over the last two decades the study of discourse in film and television has become one of the most promising research avenues in stylistics and pragmatics due to the dazzling variety of source material and the huge pragmatic range within it Meanwhile with the advent of streaming and the box set film and television themselves are becoming separated by an increasingly blurred line This volume closes a long standing gap in stylistics research bringing together a book level pragmastylistic showcase It presents current developments from the field from two complementary perspectives looking stylistically at the discourse in film and the discourse of and around film This latter phrase comes to mean the approaches which try to account for the pragmatic effects induced by cinematography This might be the camera work or the lighting or the mise en sc ne or montage The volume takes a multimodal approach looking at word movement and gesture in keeping with modern stylistics The volume shows how pragmatic themes and methods are adapted and applied to films including speech acts im politeness implicature and context In this way it provides systematic insights into how meanings are displayed enhanced suppressed and negotiated in both film and televisual arts

*Mind Style and Cognitive Grammar* Louise Nuttall,2020-03-19 *Mind Style and Cognitive Grammar* advances our understanding of mind style the experience of other minds or worldviews through language in literature This book is the first to set out a detailed unified framework for the analysis of mind style using the account of language and cognition set out in cognitive grammar Drawing on insights from cognitive linguistics Louise Nuttall aims to explain how character and narrator minds are created linguistically with a focus on the strange minds encountered in the genre of speculative fiction Previous analyses of mind

style are reconsidered using cognitive grammar alongside original analyses of four novels by Margaret Atwood Kazuo Ishiguro Richard Matheson and J G Ballard Responses to the texts in online forums and literary critical studies ground the analyses in the experiences of readers and support an investigation of this effect as an embodied experience cued by the language of a text Mind Style and Cognitive Grammar advances both stylistics and cognitive linguistics whilst offering new insights for research in speculative fiction

*I. A. Richards and the Rise of Cognitive Stylistics* David West, 2013-09-26 I A Richards is an influential figure in literary criticism but has rarely been thought of as someone who laid the foundations for cognitive stylistics This book proposes that Richards was a protocognitivist West argues that Richards anticipated many of the discipline's core aims methods and assumptions The book argues that the roots of cognitive psychology lie in early 20th century psychology when there was a focus on cognitive processes such as memory and learning attention categorisation perception and consciousness It was this cognitive psychology that Richards drew upon to build a theory of literature and interpretation which in itself prefigured cognitive stylistics West also suggests that Richards is one of the more influential British intellectuals of the 20th century and that his work is still relevant today West argues that cognitive stylistics is not as Peter Stockwell has written a new science of literature and reading but rather a discipline with a history that it continues to deny itself This book will appeal to researchers and advanced students in stylistics and literary studies

*World Building in Spanish and English Spoken Narratives* Jane Lugea, 2017-12-28 Text World Theory is a powerful framework for discourse analysis that thus far has only been used in monolingual Anglophone stylistic analyses This work adapts Text World Theory for the analysis of Spanish discourse and in doing so suggests some improvements to the way in which it deals with discourse in particular with direct speech and conditional expressions Furthermore it applies Text World Theory in a novel way searching not for style in language but for the style of a language Focusing principally on deixis and modality the author examines whether Spanish speakers and English speakers construct the narrative text world in any patterned ways To do so the frog story methodology is employed eliciting spoken narratives from native adult speakers of both languages by means of a children's picture book These narratives are transcribed and subjected to a qualitative text world analysis which is supported with a quantitative corpus analysis The results reveal contrasts in Spanish and English speakers use of modality and deixis in building the same narrative text world and are relevant to scholars working in language typology cross cultural pragmatics and translation studies These novel applications of the Text World Theory push the boundaries of stylistics in new directions broadening the focus from monolingual texts to languages at large

**Experiencing Poetry** Willie van Peer, Anna Chesnokova, 2022-12-01 How do we experience poetry as readers What is it in the text that provokes particular reactions and how can we methodologically reveal these effects Introducing an evidence based approach to poetics this book explores the psychological effects of poetic form and content with an emphasis on how real readers respond to and experience poetry Engaging with texts from diverse cultural and historical settings it covers the basics of stylistic theory while at the same time
