concerning derivative pricing and hedging To keep the reader intrigued and motivated the book has a sandwich structure probability and stochastics are given in situ where mathematics can be readily illustrated by application to finance The first part of the book introduces one of the main principles in finance no arbitrage pricing It also introduces main financial instruments such as forward and futures contracts bonds and swaps and options The second part deals with pricing and hedging of European and American type options in the discrete time setting In addition the concept of complete and incomplete markets is discussed Elementary probability is briefly revised and discrete time discrete space stochastic processes used in financial modelling are considered The third part introduces the Wiener process Ito integrals and stochastic differential equations but its main focus is the famous Black Scholes formula for pricing European options Some guidance for further study within this exciting and rapidly changing field is given in the concluding chapter There are approximately 100 exercises interspersed throughout the book and solutions for most problems are provided in the appendices

Options, Futures, and Other Derivatives John Hull,2011 [Financial Innovation and Engineering in Islamic Finance](#) Samir Alamad,2017-04-13 This book provides two important contributions to existing theories in the financial innovation literature First it extends the existing literature of innovation orientation to a completely new field and construct that is based on a religious imperative as a framework within which financial innovation is constrained It explains how an innovation orientation in IFIs can be directed within religious rules which indicates that innovation orientation in IFIs is a learning philosophy Second the book introduces and examines the plasticity of Shariah as a shared boundary object and its dynamic role in managing tension and conflicting values in the financial innovation process Furthermore building on the empirical results the study illustrates the insights that each theoretical lens affords into practices of collaboration and develops a novel analytical framework for understanding religious orientation towards financial innovation This practical contribution of the developed framework could form the basis for a standardised framework for the Islamic finance industry The book concludes by noting the policy and managerial implications of its findings and provides directions for further research
