Sustainable Energy Elisabeth M. Drake,2005 **The Humachine** Nada R. Sanders,John D. Wood,2024-03-11 Updated for a post Covid world the second edition of this groundbreaking book explains why becoming a Humachine enterprise is the only way forward for a company to maintain a competitive advantage in the age of artificial intelligence AI The first edition of

The Humachine offered a foundation for a new form of enterprise integrating AI technology and human resources to optimize the unique advantages possessed by each. Now in the face of the Great Resignation and botsourcing where an activity previously done by humans is replaced by technology, thought leaders Sanders and Wood present a more positive and promising scenario where an enterprise recognizes human resources as an asset class that possesses skills that cannot be replaced by automation. Enlightened business leaders will look to create synergy between technology and people, enabling the organization to maximize its capabilities by elevating the basis of decision making with closer to perfect information and rationality. This book provides a roadmap for how to do this and achieve collective intelligence at the enterprise level superintelligence. More specifically, it answers these questions and more: Why must an enterprise achieve superintelligence as a competitive advantage in the age of AI? How can any organization achieve superintelligence by following the 4 I model? What is the step by step process an enterprise should follow in becoming a Humachine? What strategies can be used by enterprise leaders to futureproof the Humachine against uncertainty? All business leaders, executives and managers at companies wanting to use AI and technology to survive and thrive in this new age and students of analytics and decision making will value this thought provoking and practical book rich with case studies.

Sustainable Energy Technologies and Low Carbon Buildings Saffa Riffat, Mardiana Idayu Ahmad, Aliff Shakir, 2024-12-28. This book aims to offer an in depth guide and fundamental comprehension of sustainable energy technologies and their essential function in decreasing energy consumption in buildings under diverse climatic conditions. It has been designed to stimulate additional research and innovation especially in the field of green technology for building applications. This book embodies the culmination of extensive research and case studies encompassing the initial developments to the latest advancements in sustainable energy systems, particularly emphasising energy efficient building technologies. It also highlights up to date reviews and research into meeting low and zero carbon demand in buildings and includes extensive coverage of established and emerging sustainable energy technologies for building applications, addressing their physical principles, mechanisms, applications and cutting edge technological advances. The coverage of the book is divided into five main parts: Thermal energy efficient systems, Sustainable power generation, Energy efficient lighting technologies, Zero energy and low carbon buildings, and Eco cities as sustainable urban living. Taken together, they provide a concise explanation of low and zero carbon buildings' role in tackling the world's energy challenges, with an emphasis on design, conversion techniques and materials, and on the economic and environmental assessment of technology. Innovative concepts, design and planning in connection with global urbanization and improving sustainable development are also discussed. In addition, the book features case studies on worldwide sustainable energy technologies, low and zero carbon buildings, and eco cities as sustainable urban environments. This book offers a valuable source of information for developers, architects, building managers and owners, and engineers working in sustainable energy fields, as it provides in depth information on a diverse range of technologies designed to achieve environmentally

friendly solutions The book also benefits students and academics as it offers optimal supporting material for an introductory course in this field
