

VOLVO PENTA AQUAMATIC DUOPROP KAD300/DP

6-cylinder, 24-valve, direct-injected marine diesel engine with charge air compressor, turbocharger, aftercooler and Duoprop drive. 210 kW (285 hp)*

* Crankshaft power according to ISO 8665

Compressor-charged Hi-Tech propulsion package

Volvo Penta's 6-cylinder KAD300 is packed with virtually everything. Compressor, turbo and aftercooler, which are precisely controlled by the EDC system (Electronic Diesel Control), all help to produce unmatched diesel performance. This coupled to the efficient Duoprop drive gives power to the most demanding boat owners.

The compressor – fitted with silencers – is controlled by the EDC unit and acts as a "torque controller". It supplies compressed air at low engine speed and while accelerating, when the extra torque is needed.

The interaction of compressor and turbo produces high torque over the whole speed range, and this contributes to cleaner exhaust gases and fuel economy, giving excellent acceleration and driving characteristics.

Innovative EDC

Equipped with EDC (Electronic Diesel Control) – an electronically controlled processing system, which optimizes engine performance. The system determines the precise quantity of fuel required at any given moment, taking full account of variation in operating temperatures, air pressure and other contributing factors.

A great advantage with the EDC system is its monitoring of fuel temperature, which keeps the engine on a constant output from 5 to 55°C (41–131°F).

The EDC system includes electric shift and throttle control with wiring giving precise and smooth operation, with no noise transmitted along the cables.

If twin engines are fitted, a synchronizing function keeps the engines on the same rpm.

The original Duoprop drive

The reinforced and new-designed DP drive with its twin counter-rotating stainless steel propellers produces a harmonious drive unit with unbeatable characteristics in the boat in terms of top speed, acceleration and drivability.

It also produces less noise and vibrations, better steering and maneuvering characteristics, a good grip in the water and a short time to planing.

KAD300 with DP-G Duoprop drive

The drive features standard power steering for maximum driving comfort.

High output, excellent power/weight ratio

The engine is compact with no remote-mounted functions, and has an advantageous weight to power ratio making it excellent for both single- and multi-engine installation in planing craft.

Low exhaust emission levels and a professional exhaust system

Direct injection, 4-valve technology, EDC and the advanced combustion system all minimize noxious exhaust emissions and enhance overall enjoyment of boating.

The DP-G drive has been designed to lead exhaust gases into the propeller path, to avoid the "wagon-back effect" and keep noise level at a minimum.

The engine is certified according to SAE and IMO.

A propulsion package fully matched, tested and supported by one company

The combination of power and unbeaten propulsion efficiency ensures maximum

thrust for excellent acceleration, top speed performance and driving comfort.

Easy installation and maintenance

The installation does not require any extra through-hull fittings. All necessary connections like exhaust, seawater inlet etc. are integrated in the drive. Only a minimum of loose parts, making installation easy and time-saving.

Electronic control and instrument wiring are of plug-in type. The EDC system includes a self-diagnostic facility.

Service points such as seawater strainer, cooling water tank and oil dipstick are easily accessible on the engine.

Comprehensive service network

Volvo Penta has a well-established network of authorized service dealers in more than 100 countries throughout the world. These service centers offer Genuine Volvo Penta Parts as well as skilled personnel to ensure that you enjoy the best possible service.
