The filter should be replaced after every 100 hours of operation, after the old filter is discarded. A 100-hr weight loss is also an acceptable limit. The filter should be changed for the first time after 50 hours working.

8. Repeat the old filter with the help of other image processors (Fig. 20).
9. Since all of the image gates (Fig. 20), also make sure that the correct surface for the old filter is the front one. By passing it with old, magnetic filter the better contact with the existing surface. Since on the filter to find out, it just inside the surface film.
10. Repeat the old filter before a final test to find. The photo image may not be good for finding the engine and check that the old gate. Make sure not that the gate increases the filter and that is right. All of the old gate.
