Operating Manual for Spaceship Earth Richard Buckminster Fuller,1970 R Buckminster Fuller s Operating Manual for Spaceship Earth published in 1969 imagines our species as a crew united by a shared fate on a tiny spaceship traveling through infinity It can be read even today as the most intelligent metaphor for thinking about humankind on this planet Fuller accepted the challenge pre sented by this metaphor using his inventions writings to contribute to the safe operations of Spaceship Earth This title is an exact facsimile of the 1969 edition **Border**

Ecology Ila Nicole Sheren,2023-03-10 This book analyzes how contemporary visual art can visualize environmental crisis It draws on Karen Barad s method of agential realism which understands disparate factors as working together and entangled Through an analysis of digital eco art the book shows how the entwining of new materialist and decolonized approaches accounts for the nonhuman factors shaping ecological crises while understanding that a purely object driven approach misses the histories of human inequality and subjugation encoded in the environment The resulting synthesis is what the author terms a border ecology an approach to eco art from its margins gaps and liminal zones deliberately evoking the idea of an ecotone This book is suitable for scholarly audiences within art history criticism and practice but also across disciplines such as the environmental humanities media studies border studies and literary eco criticism *Operating Manual for*

Thinking with the Harrisons Anne Douglas, Chris Fremantle, 2024-09-30 Helen Mayer Harrison and Newton Harrison known as the Harrisons dedicated five decades to exploring and demonstrating a new approach to artistic practice centred on doing no work that does not attend to the wellbeing of the web of life Their collaborative practice pioneered a way of drawing together art and ecology They closely observed often with irony and humour how human intervention disrupts the dynamics of life as a web of interrelationships The authors of this book think with the Harrisons critically tracing their poetics as a reimagining and reconfiguring of the arts in response to the unfolding planetary crisis They draw parallels between the artists poetics and rethinking in the philosophy of science particularly drawing on the work of Isabelle Stengers and Alfred North Whitehead Thinking with the Harrisons is for anyone concerned with the implications of ecology as part of a reimagining of public life including through the interaction of art and science Throughout their joint practice the Harrisons sought to engage policy makers governments ecologists

artists and inhabitants of specific places sensitizing us to the crises that emerge from grounded experiences of place and time
