This approachable text supports students in applying concepts and methods by providing solved problems, examples, questions, practice problems, and cases. *Management Approach for Resource-Productive Operations* Markus Hammer, 2018-07-10

Markus Hammer investigates a time-based and analytics-supported operations management approach. He explores five perspectives: 1 the needs of industry in particular manufacturing in process industries, 2 the impact of digitization with focus on Big Data and analytics, 3 the management of operations through time-based performance metrics, 4 how operations improvement methods and advanced process control help achieve resource-productive operations, and 5 learning from practice based on two empirical case studies. The author conceives, explains, and tests an implementation methodology. The final case study proves that the developed implementation methodology works in practice. Information
