

## Part Three

### PLANNING AND CONTROL

The physical design of an operation should have provided the fixed resources which are capable of satisfying customers' demands. Planning and control are concerned with operating those resources on a day-to-day basis and ensuring availability of materials and other variable resources in order to supply the goods and services which fulfil customers' demands. This part of the book will look at several different aspects of planning and control, including some of the specialist approaches which are used in particular types of operations.
