Opinion Essay Writing Using Thinking Maps:

How to Write Well: a Guide for Health and Social Care Students June Keeling, Hazel Chapman, Julie Williams, 2013-10-16

Good writing skills are essential for study but many students find that they struggle to write well. Written especially for health and social care students, this book demystifies academic writing, giving you a better understanding of what good writing looks like and how to achieve it. Topics covered in this accessible book include: How to plan and write pieces to deadlines; How to copyedit and proofread your own work; How to develop good writing behaviours and find motivation; How to write effective and safe service user records. This user-friendly guide includes examples of good and bad writing activities to work through, handy hints and tips at the end of each chapter, and personal experiences from students, making it a must-read for any health and social care students looking for the skills and confidence to master good academic writing. Contributors: Michael Baksh, Amanda Clarke, Elizabeth Cooper, James Greaves, Dasha Koneva, Jane Quigley, Victoria Ridgway, Dr Carol Lewis, Roylance Pat Talbot, Richard Williams, Mary Williams. This book is aimed at students but I am sure that it has an audience beyond that; we all need help and encouragement to write. Full of practical advice and examples, this book will help you to find a writing strategy that works for you and to develop your own style. Some simple but very effective ideas are used, such as making writing a normal activity, just keeping going and not necessarily starting at the beginning. Roger Watson, Professor of Nursing, University of Hull, UK. The focus of this book is on how to write well. As I have argued previously, we all need to be reminded of the skills required in order to make a difference to our patient clients and their carers' lives. Lifelong learning is the way that we update our knowledge, skills, and competencies. But in order to do this effectively, we need to have the right skill set. The ability to write well is fundamental to our personal and professional learning, and this is regardless of what stage we are in our careers. Writing is a skill that we use every day, be it an email to a friend or an assignment for a course. With practice, we can develop and refine this essential skill. I particularly like the way the authors encourage us to be critical of our writing; this is also something that we can offer to others as critical friends. Sian E Maslin Prothero, Professor of Nursing, Clinical School of Nursing, Midwifery, and Sir Charles Gairdner Hospital, Edith Cowan University, Western Australia. *Communication Skills for Engineers* Sunita Mishra, C. Muralikrishna, 2011. The new second edition of *Communication Skills for Engineers* brings in a sound understanding and insight into the dynamics of communication in all spheres of life: interpersonal, social, and professional. The book hinges on the premise that effective communication is an outcome of using the right combination of skills alongside an appropriate attitude.
