**Oracle Application Server 10g** Erin Mulder, Rob Harrop, Jan Machacek, Michael Wessler, 2013-11-09 Oracle Application Server 10g J2EE Deployment and Administration focuses on the latest version of Oracle's fully J2EE certified application server previously called Oracle9iAS. Oracle Corporation is aggressively attacking this market with a new low cost version of the server as well as a program to move BEA customers onto Oracle free of charge. Adoption interest is growing rapidly amidst favorable reports regarding performance and reliability. Deploying and configuring J2EE applications are some of the trickiest processes in J2EE development and they unfortunately receive scant attention in general J2EE texts. This book is a focused no frills guide to getting J2EE applications up and running on 10g. It covers Oracle's J2EE container OC4J available free of charge for development purposes in full detail. It moves on to explain how to best configure and use the various enterprise level features that come with the commercial editions. This is the book for anyone wanting to stay ahead in the world of Oracle's application servers. [DBA Study Guide - OCP Prep Guide](#) Abdul, 2006

**Oracle Modernization Solutions** Tom Laszewski, Williamson, Jason, 2008-09-19 This book combines case studies with practical examples of how to implement modernization techniques using Oracle and partner products to modernize to the Oracle Platform. The book also weighs the pros and cons of specific modernization use cases. Finally we explore some of the emerging trends in technology and how they apply to legacy modernization. Legacy system architects, project managers, program managers, developers, database architects and decision makers who own mainframe and heterogeneous systems and are tasked with modernization will all find this book useful. The book assumes some knowledge of mainframes, J2EE, SOA and Oracle technologies. The reader should have some background in programming and database design.
