Retention and Human Rights Matthew White, 2024-09-16 This book analyses the compatibility of data retention in the UK with the European Convention on Human Rights ECHR The increase in the use of modern technology has led to an explosion of generated data and with that a greater interest from law enforcement and intelligence agencies In the early 2000s data retention laws were introduced into the UK and across the European Union EU This was met by domestic challenges before national courts until a seminal ruling by the Court of Justice in the European Union CJEU ruled that indiscriminate data retention was incompatible with EU law Since then however the CJEU has revised its position and made certain concessions particularly under the guise of national security This book focuses on data retention in the UK with the principal aim of examining compatibility with the ECHR This is explored through a variety of ways including providing an account of democracy and why secret surveillance poses a threat to it a history of data retention assessing the seriousness that data

retention poses to fundamental rights the collection of rights that are affected by data retention which are crucial for a functioning democracy the implications of who can be obligated to retain and what to retain the idea that data retention is a form of surveillance and ultimately with all things considered whether this is compatible with the ECHR The work will be an invaluable resource for students academics researchers and policy makers working in the areas of privacy human rights law and surveillance
