## **Susana Y Javier Chapter Summaries:**

**Visual Perception Part 1** Susana Martinez-Conde, S. Macknik, Maria M. Martinez, Jose-Manuel Alonso, Peter U. Tse, 2006-10-05 This book presents a collection of articles reflecting state of the art research in visual perception specifically concentrating on neural correlates of perception Each section addresses one of the main topics in vision research today Volume 1 Fundamentals of Vision Low and Mid Level Processes in Perception covers topics from receptive field analyses to shape perception and eye movements A variety of methodological approaches are represented including single neuron recordings fMRI and optical imaging psychophysics eye movement characterization and computational modelling The contributions will provide the reader with a valuable perspective on the current status of vision research and more importantly with critical insight into future research directions and the discoveries yet to come Provides a detailed breakdown of the neural and psychophysical bases of Perception Presents never before published original discoveries Includes multiple full color illustrations

**Marxism and Psychoanalysis** David Pavon-Cuellar, 2016-12-19 The methods developed by Freud and Marx have enabled a range of scholars to critically reflect upon the ideological underpinnings of modern and now postmodern or hypermodern western societies In this intriguing book the discipline of psychology itself is screened through the twin dynamics of Marxism and psychoanalysis David Pavon Cuellar asks to what extent the terms concerns and goals of psychology reflect in fact the dominant bourgeois ideology that has allowed it to flourish The book charts a gradual psychologization within society and culture dating from the nineteenth century and examines how the tacit ideals within mainstream psychology creating good citizens or productive workers sit uneasily against Marx and Freud's ambitions of revealing fault lines and contradictions within individualist and consumer oriented structures The positivist aspiration of psychology to become a natural science has been the source of extensive debate critical voices asserting the social and cultural contexts through which the human mind and behaviour should be understood This challenging new book provides another voice that in addressing two of the most influential intellectual traditions of the past 150 years widens the debate still further to examine the foundations of psychology

**Indigenous America in the Spanish Language Classroom** Anne Fountain, 2023-06-01 A critical resource for inclusive teaching in the Spanish classroom Although Indigenous peoples are active citizens of the Americas many Spanish language teachers lack the knowledge and understanding of their history culture and languages that is needed to present the Spanish language in context By presenting a more complete picture of the Spanish speaking world Indigenous America in the Spanish Language Classroom invites teachers to adjust their curricula to create a more inclusive classroom Anne Fountain provides teachers with key historical and cultural information about Indigenous peoples throughout the Americas and explains how to incorporate relevant resources into their curricula using a social justice lens This book begins with an overview of the Iberian impact on Indigenous Americans and connects it to language teaching giving practical ideas that are tied to language learning standards Each chapter finishes with a list for

further reading inviting teachers to dig deeper The book ends with a set of ten conclusions and an extensive list of resources organized by topic to help teachers find accurate information about Indigenous America to enrich their teaching Fountain includes illustrations that relate directly to teaching ideas Hard to find resources and concrete teaching ideas arranged by level as well as a glossary of important terms make this book an essential resource for all Spanish language teachers

*Science Education in Focus* Mary V. Thomase, 2008 This is hardly another field in education which is more important for a country's future than science education Yet more and more students elect to concentrate on other fields to the exclusion of science for a variety of reasons 1 The perception of degree of difficulty 2 The actual degree of difficulty 3 The lack of perceived prestige and earnings associated with the field 4 The dearth of good and easy to use texts 5 The lack of society in comprehending the significance of science and creating attractive incentives for those who enter the field This new book focuses on issues of primary significance in the field

**Southern Hemisphere Palaeobiogeography of Triassic-Jurassic Marine Bivalves** Susana E. Damborenea, Javier Echevarría, Sonia Ros-Franch, 2012-09-26 Palaeobiogeography is a complex subject which processes information provided by both Biology and Earth Sciences It is conceptually and philosophically equivalent to neobiogeography Nevertheless its methods are somewhat different since it is limited by the incompleteness of the fossil record On the other hand it has direct access to the time dimension a key ingredient of organic evolution Mesozoic benthonic mollusks and especially bivalves have a great potential for palaeobiogeographical analysis due to their commonly good preservation abundance diversity and high dispersion potential at the larval stage From a merely descriptive point of view the analysis of their distribution shows latitudinal gradients and distributional patterns both at regional and global scales which are the basis for the recognition of biochoremas or palaeobiogeographical units of different ranks Moving forward towards a causal palaeobiogeography these organisms also provide interesting insight into particular biogeographical questions such as bipolarity and its origin The evolution in time of the recognized biochoremas can be discussed in relation to palaeoclimas and extinction events Finally some of the results obtained from the analysis of the distribution of past bivalve biotas were even used to propose and discuss the development of marine corridors and argue about the distribution of continents in the past

**Literary Censorship in Francisco Franco's Spain and Getulio Vargas' Brazil, 1936-1945** Gabriela de Lima Grecco, 2020-04-14 This book presents two systems of censorship and literary promotion revealing how literature can be molded to support authoritarian regimes The issue is complex in that at a descriptive level the strategies and methods new states use to control communication through the written word can be judged by how and when formal decrees were issued and how publishing media whether in the form of publishing companies or at the individual level engaged with political overseers But equally literature was a means of resistance against an authoritarian regime not only for writers but for readers as well From the point of view of historical memory and intellectual history stories of people without history and the production of their texts through the literary underground can be

constructed from subsequent testimony from books sold in secret to the writings of women in jail to books that were written but never published or distributed in any way and to myriad compelling circumstances resulting from living under fascist authority A parallel study on two fascist movements provides a unique viewpoint at literary social and political levels Comparative analysis of literary censorship literary reward allows an understanding of the balance between dictatorship official policy and what literary acts were deemed acceptable The regime need to control its population is revealed in the ways that a particular type of literature was encouraged in the engagement of propaganda promotion and in the setting up of institutions to gain international acceptance of the regime The work is an important contribution to the history of twentieth century authoritarianism and the development fascist ideas

**The Dynamics of Violence and Revenge in the Hebrew Book of Esther** Francisco-Javier Ruiz-Ortiz,2017-03-13 This volume offers a thematic study of an integral part of the Hebrew text of Esther namely violence In The Dynamics of Violence and Revenge in the Hebrew Book of Esther Francisco Javier Ruiz Ortiz makes the first ever monographic research on the topics of hostility and the mechanisms of revenge as expressed by the author of the Hebrew book of Esther The present book is divided into two parts consisting of three chapters each After an introductory chapter reviewing previous studies on the book of Esther the author analyses the main vocabulary of violence and revenge in this biblical text before studying the narrative of Esther from the point of view of violence The results of these two avenues of research are then applied on three pericopes which are representative of the dynamics of violence Each of the chosen texts illustrates how violence and revenge are used by the author to express the message of survival and the importance of the Jewish people

**Interpreting the Internet** Elisabeth J. Friedman,2017 Every user knows the importance of the symbol in internet communication Though the symbol barely existed in Latin America before the emergence of email Spanish speaking feminist activists immediately claimed it to replace the awkward o a used to indicate both genders in written text discovering embedded in the internet an answer to the challenge of symbolic inclusion In repurposing the symbol they changed its meaning In Interpreting the Internet Elisabeth Jay Friedman provides the first in depth exploration of how Latin American feminist and queer activists have interpreted the internet to support their counterpublics Aided by a global network of women and men dedicated to establishing an accessible internet activists have developed identities constructed communities and honed strategies for social change And by translating the internet into their own vernacular they have transformed the technology itself This book will be of interest to scholars and students in feminist and gender studies Latin American studies media studies and political science as well as anyone curious about the ways in which the internet shapes our lives
