

## C. Volvo Scan Tool (ST), functions

### CA. General

Volvo ST with memory module adapter communicates with the vehicle electronic control modules. By connecting Volvo ST to vehicle OBD, ST can be used for read and erase, reprogramming and hardware adjustment, codes and input/output test of functions related to:

The electronic controller is used to read out STTC, status reports and monitor, erase STTC, freeze frame when a STTC is set, input/output test of input signals (monitor level, status and program control status).

STTC status reports and calculated values are stored in the memory module RAM. This means that if a STTC is stored in memory as a diagnostic, STTC and status reports are erased and the memory is clear.

Because of changing development work, not all of the functions described above are available in earlier versions of the Volvo ST memory module and in the introduction.
