

**INSTRUCTIONS FOR PAPER #2:
Method Section**

General instructions: Write an APA-style method section based on your group research. For this writing assignment only, you **must** write in collaboration with your other group members. The group must submit only one method section, for which each group member will receive the same grade.

Specific parts of an APA report required for this assignment

1. Method section, complete with proper headings, standard subheadings, and appropriate contents written in standard APA format. Subsections you should include are:

- Participants
- Materials
- Design (optional)
- Procedure

Background resources to consult before you begin writing and as you write

1. Textbook – use the information in Chapter 2 of your text as well as the appendix to emulate a research paper method section.
2. The Publication Manual of the American Psychological Association is the ultimate resource for writing your paper. If you have any questions left unanswered by your textbook and class handouts, refer to this guide.
3. You will need to refer to your notes covering the research study you are writing about.

Presentation form

1. The method section report is to be printed by a computer printer.
2. Attach a cover sheet with the names of all the members of your writing team, the number of the course (Psych 5), instructor's name, and the date on which you submitted the report. Do **not** include any other cover or binder or extra pages. Simply staple your completed pages together in order.
3. Submit one copy of Paper #2. (Every group member should keep a copy of the submitted paper.)

Audience / writing perspective

1. The paper is to be written as though it will be read by an intelligent but uninformed outsider—someone who is somewhat sophisticated and generally aware of psychology, but who was not present on the day the research was conducted. (In other words, do not write with the assumption that "the instructor will know what I mean." Include all essential points and explain what needs to be explained.) One way to check on whether your paper is understandable is to have someone who is not in the class (but who cares enough to give you good feedback) read the paper and tell you if they understand all your points.
2. Write the paper from the perspective of being a member of a research group.

Length

Adequacy of your paper will be judged by its contents, not by its length. Write your report according to essentials that are required by APA format, as detailed in Appendix A of your textbook and in your *APA Publication Manual*. Your paper is long enough when you have covered what needs to be covered.
