Categories of triage during
mass casualty events:

Class 1
Class 2
Class 3
Class 4

Underlying Principles

Emergent or Immediate Category(Class 1): Highest priority is given to clients who have life-threatening injuries but also have a high possibility of survival once they are established

Urgent or Delayed Category (Class 2): Second-highest priority is given to clients who have major injuries that are not yet life-threatening and can usually wait 30 min to 2 hours for treatment.

Nonurgent or Minimal Category(Class 3): The next highest priority is given to clients who have minor injuries that are not life-threatening and do not need immediate attention.

Expectant Category(Class 4): The lowest priority is given to the clients who are not expected to live and are allowed to die naturally. Comfort measures can be provided, but restorative care is not.

Nursing Interventions

WHO? WHEN? WHY? HOW?

Nurses, as well as a cross-section of other members of the health care team, are involved in the department of a disaster plan for such emergencies. Roles for each employee are outlined and administrative control is determined. A designated area for the area command center is identified as well as a person to serve as the incident control manager.
